Questions 1 to 4 are based on the conversation you have just heard.

p-1-1 原文

W: Thank you for meeting with me, Stephen, at such short notice.

W: 谢谢你在这么短的时间内抽空见我，Stephen。

查看该段公开来源

p-1-2 原文

M: Not a problem, Margaret. Now, please give me some good news. Have you agreed to my last proposal?

M: 没问题，Margaret。现在，请告诉我一些好消息。你同意我上次的提议了吗？

查看该段公开来源

p-1-3 原文

W: I have, indeed. And I wish to sign the agreement pending one small change to be made to the contract.

W: 确实同意了。我希望签署协议，前提是对合同做一处小改动。

查看该段公开来源

p-1-4 原文

M: Margaret, we've been through this for almost a year now, back and forth, making alterations. Are you sure you want to make a sponsorship deal for your clients, or not? I ask this, because, frankly, some people at my end are running out of patience.

M: Margaret，我们为这件事来回磋商、不断修改，已经快一年了。你到底确定要为你的客户达成一项赞助协议，还是不想？我之所以这样问，是因为坦率地说，我这边有些人已经快失去耐心了。

查看该段公开来源

p-1-5 原文

W: I understand your concerns. But as I'm sure you understand, we hold our clients' best interests to be of the utmost concern. We therefore comb

through the fine details of all contracts, rest assured, we all appreciateyour firm's patience.

W: 我理解你的担忧。不过，我相信你也明白，我们最关心的是客户的最大利益。因此，我们会仔细审阅所有合同的细节，请放心，我们都很感谢贵公司的耐心。

查看该段公开来源

p-1-6 原文

M: OK, fine. So what change do you wish to make?

M: 好吧，没问题。那么你想做什么改动？

查看该段公开来源

p-1-7 原文

W: Essentially, we would like the new deal to exclude the Middle East. That's all.

W: 基本上，我们希望新协议不包括中东地区。就这些。

查看该段公开来源

p-1-8 原文

M: The Middle East? Why?

M: 中东地区？为什么？

查看该段公开来源

p-1-9 原文

W: My client has a couple of other prospective marketing deals from companies in the Middle East. Those offers, should they materialize, would exclusively employ my client's image in the Middle East only. Therefore, in order to avoid any conflict, we would need to ensure that both marketing campaigns do not overlap geographically.

W: 我的客户还收到几家中东公司的其他潜在营销合作邀约。如果这些邀约最终落实，对方将只在中东地区使用我客户的形象。因此，为了避免任何冲突，我们需要确保这两项营销活动在地域上不会重叠。

查看该段公开来源

p-1-10 原文

M: What business sector in the Middle East are we talking about here?

M: 你说的中东业务具体属于哪个行业？

查看该段公开来源

p-1-11 原文

W: Real estate.

W: 房地产。

查看该段公开来源

p-1-12 原文

M: Well, that should be okay then. So long as the product is very different from our food and beverage market, there should be no conflict of interest. Nevertheless, I will have to run this through my people. I don't foresee any problem, though. The Middle East is a negligible market for us, but I still need to check this with a couple of departments.

M: 那应该没问题。只要产品与我们的食品和饮料市场有很大不同，就不应存在利益冲突。不过，我还是得把这件事拿去和我的团队确认一下。但我预计不会有什么问题。中东对我们来说是个微不足道的市场，不过我仍然需要和几个部门核实一下。

查看该段公开来源

Questions 5 to 8 are based on the conversation you have just heard.

p-5-1 原文

M: Next, we have a special science-related news story. Paula Hancocks at the Denver Observatory. Paula, what is the big story over there?

M：接下来是一则特别的科学新闻报道。丹佛天文台的 Paula Hancocks，Paula，那边有什么重大新闻？

查看该段公开来源

p-5-2 原文

W: Hi, John. Yes, all the astronomers on site here are very excited. In fact, space enthusiasts all across North America and the rest of the Northern Hemisphere will be congregating on mountain tops tonight to watch the night's sky.

W：你好，John。是的，这里的所有天文学家都非常兴奋。事实上，整个北美以及北半球其他地区的太空爱好者今晚都会聚集到山顶，观看夜空。

查看该段公开来源

p-5-3 原文

M: Why? What's the big event? Is there an eclipse happening soon?

M：为什么？有什么重大事件？很快要发生日食了吗？

查看该段公开来源

p-5-4 原文

W: Tonight, the Earth will come into close proximity with the Oppenheimer comet. It is the closest our planet has been to such a phenomenon in over 100 years. For this reason, it is expected that thousands of people will gaze up at the sky tonight in order to see this formidable object.

W：今晚，地球将与 Oppenheimer 彗星近距离接近。这是100多年来我们的星球距离此类现象最近的一次。因此，预计今晚会有数千人仰望天空，观看这个令人震撼的天体。

查看该段公开来源

p-5-5 原文

M: How far away is this comet? Will people be able to see it with the naked eye?

M：这颗彗星距离我们有多远？人们用肉眼能看到它吗？

查看该段公开来源

p-5-6 原文

W: The Oppenheimer comet will still be millions of miles away, on the edge of our galaxy. But nevertheless, this is a relatively close distance, close enough for people to observe in good detail through a telescope. People will only see a blur without one. However, that does not mean one needs professional equipment. Even the most ordinary of telescopes should be conducive for people to observe and wonder at this flying object.

W：Oppenheimer 彗星仍会位于数百万英里之外，在我们银河系的边缘。不过，这仍然算是相对较近的距离，近到人们可以通过望远镜清楚地观测它。没有望远镜的话，人们只能看到一团模糊的影像。不过，这并不意味着必须使用专业设备。即使是最普通的望远镜，也足以让人们观测并惊叹于这个飞行中的天体。

查看该段公开来源

p-5-7 原文

M: Many of our viewers will be wondering how they too can take part in this once-in-a-lifetime event. Where will this comet be in the sky? How can people find it?

M：我们的许多观众都会想知道，他们怎样才能参与这场一生难遇的活动。这颗彗星会出现在天空的什么位置？人们该如何找到它？

查看该段公开来源

p-5-8 原文

W: The comet will be almost exactly due north, at 60 degrees above the equator. However, finding the comet is indeed very tricky. And scientists here have told me there are plenty of phone apps that will facilitate this.

W：这颗彗星几乎正好位于正北方，在赤道上方60度的位置。不过，找到这颗彗星确实非常困难。这里的科学家告诉我，有很多手机应用可以帮助大家定位。

查看该段公开来源

p-5-9 原文

M: How fantastic! Thank you, Paula, for the information.

M：太棒了！Paula，感谢你提供这些信息。

查看该段公开来源

Questions 9 to 11 are based on the passage you have just heard.

p-9-1 原文

Dietary guidelines form the basis for nutrition advice and regulations around the world. While there is strong scientific consensus around most existing guidelines, one question has recently stirred debate: should consumers be warned to avoid ultra-processed foods?

膳食指南构成了世界各地营养建议和相关法规的基础。尽管现有大多数指南背后都有强有力的科学共识，但最近有一个问题引发了争议：是否应当提醒消费者避免食用超加工食品？

查看该段公开来源

p-9-2 原文

Two papers published today in the American Journal of Clinical Nutrition outline the case for and against using the concept of ultra-processed foods to help inform dietary guidelines beyond conventional food classification systems. The authors, Carlos Monteiro of the University of São Paulo and Arne Astrup of Novo Nordisk Foundation, will discuss the issue in a live virtual debate August 14th during NUTRITION 2024 LIVE ONLINE.

今天发表在《美国临床营养学杂志》上的两篇论文，分别阐述了支持和反对使用“超加工食品”这一概念的理由，以帮助在传统食品分类体系之外进一步制定膳食指南。论文作者、圣保罗大学的Carlos Monteiro和Novo Nordisk Foundation的Arne Astrup，将于8月14日在NUTRITION 2024 LIVE ONLINE期间举行的线上直播辩论中讨论这一问题。

查看该段公开来源

p-9-3 原文

The debate centers around a system developed by Monteiro and colleagues that classifies foods by their degree of industrial processing, ranging from unprocessed to ultra-processed. The system defines ultra-processed foods as those made using sequences of processes that extract substances from foods and alter them with chemicals in order to formulate the final product. Ultra-processed foods are characteristically designed to be cheap, tasty, and convenient; examples include soft drinks and candy, packaged snacks and pastries, ready-to-heat products, and reconstituted meat products.

这场辩论围绕Monteiro及其同事制定的一套体系展开，该体系根据食品的工业加工程度对其进行分类，范围从未加工食品到超加工食品。该体系将超加工食品定义为：通过一系列加工步骤制成的食品，在这些步骤中，先从食品中提取物质，再使用化学品对其进行改变，以配制出最终产品。超加工食品通常被设计成价格低廉、美味可口且方便食用；其中包括软饮料和糖果、包装零食和糕点、即热食品以及再制肉制品等。

查看该段公开来源

p-9-4 原文

Studies have linked consumption of ultra-processed foods-which are packed high in salt, sugar, and fat-with weight gain and an increased risk of chronic diseases, even after adjusting for the amount of salt, sugar, and fat in the diet. While the mechanisms behind these associations are not

fully understood, Monteiro argues that the existing evidence is sufficientto justify discouraging consumption of ultra-processed foods in dietaryrecommendations and government policies.

研究表明，食用超加工食品会导致体重增加并提高患慢性疾病的风险；这类食品含有大量盐、糖和脂肪，即使在对膳食中盐、糖和脂肪的含量进行调整后，这些关联仍然存在。尽管这些关联背后的机制尚未被完全理解，Monteiro认为，现有证据已经足以支持在膳食建议和政府政策中劝阻人们食用超加工食品。

Questions 12 to 15 are based on the passage you have just heard.

p-12-1 原文

Believe it or not, human creativity benefits from constraints. According to psychologists, when you have less to work with, you actually begin to see the world differently. With constraints, you dedicate your mental energy to acting more resourcefully. When challenged, you figure out new ways to be better.

信不信由你，限制有益于人类的创造力。心理学家认为，当你可利用的资源较少时，你实际上会开始以不同的方式看待世界。有了限制，你会将 mental energy 投入到更具资源性地采取行动上。面对挑战时，你会想出新的方法，让自己做得更好。

查看该段公开来源

p-12-2 原文

The most successful creative people know that constraints give their minds the impetus to leap higher. People who invent new products are not limited by what they don't have or can't do. They leverage their limitations to push themselves even further. Many products and services are created because the founders saw a limitation in what they use. They created innovation based on what was not working for them at the moment.

最成功的创意人士知道，限制会促使他们的思维跃得更高。发明新产品的人不会受到自己没有什么或不能做什么的限制。他们利用自身的局限，推动自己更进一步。许多产品和服务之所以诞生，是因为创始人发现自己所使用的产品或服务存在局限。他们根据当时对自己不起作用的地方创造了创新。

查看该段公开来源

p-12-3 原文

Innovation is a creative person's response to limitation. In a 2015 study which examined how thinking about scarcity or abundance influences how creatively people use their resources, Ravi Mehta at the University of Illinois and Meng Zhu at Johns Hopkins University found that people simply have no incentive to use what's available to them in novel ways. When people face scarcity, they give themselves the freedom to use resources in less conventional ways because they have to. Obstacles can broaden your perception and open up your thinking processes. Consistent constraints help you improve at connecting unrelated ideas and concepts.

创新是创意人士对局限的回应。在一项于2015年开展的研究中，伊利诺伊大学的Ravi Mehta和约翰斯·霍普金斯大学的Meng Zhu考察了对稀缺或富足的思考如何影响人们创造性地使用资源，并发现人们根本没有动力以新颖的方式利用手头的资源。当人们面临资源稀缺时，他们会迫使自己以不那么传统的方式使用资源，因为他们不得不这样做。障碍可以拓宽你的认知，并开启你的思维过程。持续存在的限制有助于你提高将不相关的想法和概念联系起来的能力。

查看该段公开来源

p-12-4 原文

Marissa Mayer, former vice president for search products and user experience at Google, once wrote in a publication on Bloomberg, " Constraints shape and focus problems and provide clear challenges to overcome; Creativity thrives best when constrained."

谷歌前搜索产品和用户体验副总裁Marissa Mayer曾在彭博社的一篇刊物中写道：“限制能够塑造问题、聚焦问题，并提供有待克服的明确挑战；创造力在受到限制时最能蓬勃发展。”

Questions 16 to 18 are based on the recording you have just heard.

p-16-1 原文

Different people use different strategies for managing conflicts. These strategies are learned in childhood. Usually, we are not aware of how we act in conflict situations. We just do whatever seems to come naturally. But we do have a personal strategy, and because it is learned, we can

always change it by learning new and more effective ways of managingconflicts. When you get involved in a conflict, there are two majorconcerns you have to take into account: achieving your personal goals andkeeping a good relationship with the other person. How important yourpersonal goals are and how important the relationship is to you affect howyou act in a conflict. Given these two concerns, five styles of managingconflicts can be identified.

不同的人会采用不同的冲突处理策略。这些策略是在童年时期学会的。通常，我们并没有意识到自己在冲突情境中是如何行动的，只是按照看似自然而然的方式去做。但我们确实都有自己的策略，而且由于这种策略是后天习得的，所以我们始终可以通过学习新的、更有效的冲突处理方式来改变它。当你卷入冲突时，有两个主要方面需要考虑：实现个人目标，以及与对方保持良好关系。个人目标对你的重要程度，以及这段关系对你的重要程度，都会影响你在冲突中的行为。根据这两个方面，可以确定五种冲突处理风格。

查看该段公开来源

p-16-2 原文

The turtle. Turtles withdraw into their shells to avoid conflicts. They give up their personal goals and relationships. They believe it is easier to withdraw from a conflict than to face it.

龟型。乌龟会缩进壳里以避免冲突。它们放弃个人目标和人际关系。它们认为，与其面对冲突，不如退出冲突更容易。

查看该段公开来源

p-16-3 原文

The shark. Sharks try to overpower opponents by forcing them to accept their solution to the conflict. They seek to achieve their goals at all costs. Sharks assume that conflicts are settled by one person winning and one person losing. Winning gives sharks a sense of pride and achievement. Losing gives them a sense of weakness, inadequacy, and failure.

鲨鱼型。鲨鱼试图迫使对方接受自己提出的冲突解决方案，从而压倒对方。它们不惜一切代价追求实现自己的目标。鲨鱼认为，冲突的解决方式是一方获胜、另一方失败。获胜会让鲨鱼产生自豪感和成就感；失败则会让它们感到软弱、无能和挫败。

查看该段公开来源

p-16-4 原文

The teddy bear. Teddy bears want to be accepted and liked by other people. They think that conflict should be avoided in favor of harmony, and believe that conflicts cannot be discussed without damaging relationships. They give up their goals to preserve the relationship.

泰迪熊型。泰迪熊希望得到他人的接纳和喜爱。它们认为，为了保持和谐，应当避免冲突，并相信讨论冲突会损害人际关系。它们放弃自己的目标，以维护这段关系。

查看该段公开来源

p-16-5 原文

The fox. Foxes are moderately concerned with their own goals and about their relationships with other people. They give up part of their goals and persuade the other person in a conflict to give up part of his goals. They seek a solution to conflicts where both sides gain something.

狐狸型。狐狸对自身目标以及与他人的关系都抱有适度的关注。它们放弃一部分自己的目标，并说服冲突中的对方也放弃一部分目标。它们寻求一种能让双方都获得一些利益的冲突解决方案。

查看该段公开来源

p-16-6 原文

The owl. Owls view conflicts as problems to be solved. They see conflicts as improving relationships by reducing tension between two people. They try to begin a discussion that identifies the conflict as a problem. By seeking solutions that satisfy both themselves and the other person, owls maintain the relationship. Owls are not satisfied until a solution is found that achieves their own goals and the other person's goals, and they are not satisfied until the tensions and negative feelings have been fully resolved.

猫头鹰型。猫头鹰把冲突视为需要解决的问题。它们认为，冲突能够通过减少两个人之间的紧张关系来改善人际关系。它们试图展开讨论，将冲突界定为一个问题。通过寻求既能满足自己又能满足对方的解决方案，猫头鹰得以维持这段关系。在找到既能实现自己的目标、又能实现对方目标的解决方案之前，猫头鹰不会感到满意；在紧张情绪和负面感受得到彻底解决之前，它们也不会感到满意。

p-19-2 原文

In Britain, organizations including the Natural History Museum, the Royal Botanic Gardens at Kew and the Wellcome Sanger Institute have joined forces to sequence Britain's 66,000 species of animals and plants. Dubbed the Darwin Tree of Life Project, it is expected to take 10 years and cost £100 million. Once completed, all the information will be publicly available to researchers.

在英国，包括自然历史博物馆、邱园皇家植物园和Wellcome Sanger研究所在内的多个组织已经联合起来，为英国的6.6万种动植物进行基因测序。该项目被称为“达尔文生命之树项目”，预计将耗时10年，耗资1亿英镑。项目完成后，所有信息都将向研究人员公开。

查看该段公开来源

p-19-3 原文

Many scientists believe that earth has now entered the sixth mass extinction, with humans creating a toxic mix of habitat loss, pollution and climate change, which has already led to the loss of at least 77 species of mammals and 140 types of birds since 1500. It is the biggest loss of species since the dinosaurs were wiped out 66 million years ago. Scientists say that sequencing every species will revolutionise the understanding of biology and evolution, bolster efforts to conserve as well as protect and restore biodiversity.

许多科学家认为，地球如今已经进入第六次大灭绝时期，人类造成的栖息地丧失、污染和气候变化的有害结合，已经导致自1500年以来至少77种哺乳动物和140种鸟类灭绝。这是自6600万年前恐龙灭绝以来最大规模的物种损失。科学家表示，对每一个物种进行测序将彻底改变人们对生物学和进化的认识，加强保护以及维护和恢复生物多样性的努力。

p-19-4 原文

Dr. Tim Littlewood, head of Life Sciences Department at the Natural History Museum, said, "Whether you are interested in food or disease, the history of how every organism on the planet has adapted to its environment is recorded in its genetic makeup. How you then harness that is dependent on your ability to understand it. We will be using modern methods to get a really good window on the present and the past. And of course, a window on the past gives you a prospective model on the future."

自然历史博物馆生命科学部负责人蒂姆·利特尔伍德博士说："无论你对食物还是疾病感兴趣，地球上每一种生物如何适应其环境的历史，都记录在它的遗传构成中。你如何利用这些信息，取决于你理解它的能力。我们将运用现代方法，真正清晰地了解现在和过去。当然，了解过去也能为未来提供一个预测模型。"

查看该段公开来源

p-19-5 原文

Sir Jim Smith, Director of Science at Wellcome, said, "Try as I might, I can't think of a more exciting, more relevant, more timely or more internationally inspirational project. Since 1970, humanity has wiped out 60 percent of animal populations. About 23,000 of 80,000 species surveyed are approaching extinction. We are in the midst of the sixth great extinction event of life on our planet, which not only threatens wildlife species, but also imperils the global food supply. As scientists, we all realise we desperately need to catalogue life on our fragile planet now. I think we're making history."

Wellcome科学部主任吉姆·史密斯爵士说："尽管我努力思考，也想不出还有哪个项目比这更加令人兴奋、更加贴近现实、更加及时，或更能激发国际社会的灵感。自1970年以来，人类已经使动物种群数量减少了60%。在接受调查的8万种物种中，约有2.3万种正走向灭绝。我们正处于地球生命第六次大灭绝事件之中，这不仅威胁野生动物物种，

也危及全球粮食供应。作为科学家，我们都意识到，现在迫切需要为我们这个脆弱星球上的生命编制目录。我认为，我们正在创造历史。”

Questions 22 to 25 are based on the recording you have just heard.

p-22-1 原文

John Donne, the English poet, wrote in the 17th century, "No man is an island, entire of itself; every man is a piece of the continent, a part of the main." Now, a British academic has claimed that human individuality is indeed just an illusion, because societies are far more interconnected at a mental, physical, and cultural level than people realise. In his new book, The Self Delusion, Professor Tom Oliver, a researcher in the Ecology and Evolution group at the University of Reading, argues there is no such thing as "self", and not even our bodies are truly "us".

英国诗人约翰·多恩在17世纪写道：“没有人是一座孤岛，自成一体；每个人都是大陆的一部分，是陆地的一部分。”如今，一位英国学者声称，人的个体性确实只是一种幻觉，因为社会在心理、身体和文化层面的相互联系，远比人们意识到的更加紧密。在他的新书《The Self Delusion》中，雷丁大学生态学与进化研究组的研究员汤姆·奥利弗教授认为，根本不存在所谓的“自我”，甚至连我们的身体也并不真正是“我们”。

查看该段公开来源

p-22-2 原文

Just as Copernicus realised the Earth is not the centre of the universe, Professor Oliver said society urgently needs a Copernican-like revolution to understand people are not detached beings but rather part of one connected identity. "A significant milestone in the cultural evolution of human minds was the acceptance that the Earth is not the centre of the universe, the so-called Copernican Revolution," he writes. "However, we have one more big myth to dispose of: that we exist as independent selves at the centre of a subjective universe. You may feel as if you are an independent individual, acting autonomously in the world; that you have an unchanging inner self that persists throughout your lifetime, acting as a central anchor-point with the world changing around you. This is the illusion I seek to tackle. We are intimately connected to the world around us."

正如哥白尼意识到地球并不是宇宙的中心一样，奥利弗教授说，社会迫切需要一场类似哥白尼革命的变革，以理解人并非彼此孤立的存在，而是同一个相互联系的身份的一部分。他写道：“人类心智文化演化中的一个重要里程碑，是人们接受地球并不是宇宙的中心，这就是所谓的哥白尼革命。然而，我们还需要摒弃另一个重大的神话：我们以独立自我的身份存在于主观宇宙的中心。你可能会觉得自己是一个独立的个体，在世界上自主行动；觉得自己拥有一个终生持续不变的内在自我，作为一个中心锚点，而世界则在你周围不断变化。这正是我试图应对的幻觉。我们与周围的世界有着密切的联系。”

查看该段公开来源

p-22-3 原文

Professor Oliver argues there are around 37 trillion cells in the body but most have a lifespan of just a few days or weeks, so the material "us" is constantly changing. In fact, there is no part of your body that has existed for more than 10 years. "Since our bodies are essentially made anew every few weeks, the material in them alone is clearly insufficient to explain the persistent thread of an identity."

奥利弗教授认为，人体内大约有37万亿个细胞，但其中大多数的寿命只有几天或几周，因此构成“我们”的物质一直在变化。事实上，你身体的任何部分都没有存在超过10年。“由于我们的身体本质上每隔几周就会重新形成，仅凭其中的物质显然不足以解释身份持续存在的脉络。”

查看该段公开来源

p-22-4 原文

Professor Oliver claims that individualism is actually bad for society, and only by realising we are part of a bigger entity can we solve pressing environmental and societal problems. Through selfish over-consumption we are destroying the natural world and using non-renewable resources at an accelerating rate. "We are at a critical crossroads as a species where we must rapidly reform our mindsets and behaviour to act in less selfish ways," he said. "So let's open our eyes to the hidden connections all around us."

奥利弗教授声称，个人主义实际上不利于社会，只有意识到我们是更大实体的一部分，才能解决紧迫的环境和社会问题。我们通过自私的过度消费正在摧毁自然世界，并以越来越快的速度消耗不可再生资源。他说：“作为一个物种，我们正处于关键的十字路口，必须迅速改变我们的思维方式和行为，以更加不自私的方式行事。因此，让我们睁开

双眼，看清周围隐藏的各种联系。”

2024-06 第2套（补充来源套号）

Questions 1 to 4 are based on the conversation you have just heard.

p-1-1 原文

M: I’ve just bought a new blender.

M: 我刚买了一台新搅拌机。

查看该段公开来源

p-1-2 原文

W: What’s that?

W: 那是什么？

查看该段公开来源

p-1-3 原文

M: A blender, you know, a machine that blends food.

M: 搅拌机，你知道，就是一种用来搅拌食物的机器。

查看该段公开来源

p-1-4 原文

W: Uh, yes, of course, the electric kitchen appliance.

W: 呃，知道，当然知道，就是那种电动厨房用具。

查看该段公开来源

p-1-5 原文

M: Exactly, this one is state-of-the-art. I’ve been meaning to buy one for a while, and I did thorough research on which specific model to get. I read through maybe hundreds of online user reviews. Anyway, it’s amazing.

M: 没错，这台是最先进的。我想买一台已经有一段时间了，而且还认真研究了到底该买哪个具体型号。我大概看了上百条网上的用户评价。总之，它太棒了。

查看该段公开来源

p-1-6 原文

W: Really? What could be so special about it? I mean it's just a blender.

W: 真的吗？它到底有什么特别的？我的意思是，它不就是一台搅拌机吗？

查看该段公开来源

p-1-7 原文

M: Well, basically, it's just a very good one. It feels heavy and sturdy and well made. It also has lots of power and can easily cut and crush practically anything. This way, the soups and juices I make come out really fine and smooth, with no lumpy bits.

M: 嗯，基本上，它就是一台非常好的搅拌机。拿在手里感觉很重、很结实，做工也很好。它的功率也很大，几乎什么东西都能轻松切碎、碾碎。这样一来，我做出来的汤和果汁都特别细腻顺滑，没有结块。

查看该段公开来源

p-1-8 原文

W: Um, I see. I've never thought of getting one myself. It sounds like the kind of thing that, for me personally, I would rarely use.

W: 嗯，我明白了。我从来没想过自己也买一台。听起来，这种东西对我个人来说应该很少会用到。

查看该段公开来源

p-1-9 原文

M: I've never had one before, and now that I do. I use it all the time. I make a fresh fruit juice in the morning, maybe not every morning, but three or four times a week, and it feels fantastic. It's a really healthy habit.

M: 我以前从来没有搅拌机，但现在有了以后，我一直在用。我早上会做新鲜果汁，也不是每天早上都做，但每周会做三四次，而且感觉特别棒。这真是个非常健康的习惯。

查看该段公开来源

p-1-10 原文

W: I can imagine that must feel quite satisfying. I can picture you getting all creative in the kitchen and trying out a multitude of different

ingredient combinations, and it's obviously going to be healthier thanbuying packaged juice from a supermarket.

W: 我能想象那一定很令人满足。我都能想象你在厨房里发挥创意，尝试各种各样的食材组合，而且这显然会比从超市买包装果汁更健康。

查看该段公开来源

p-1-11 原文

M: It's so much healthier. It's not even close. Did you know that store-bought juice is like 10% sugar?

M: 健康多了，根本不是一个级别的。你知道吗，商店里买的果汁含糖量大约是百分之十？

查看该段公开来源

p-1-12 原文

W: Right, so then you bought it for the health benefits?

W: 好吧，所以你买它主要是为了健康方面的好处？

查看该段公开来源

p-1-13 原文

M: Mostly yes. Basically, it allows me to have a more varied diet with a far wider assortment of nutrients, because it's not only fruit in my morning juices you see. I can also throw in vegetables, nuts, yogurts, cereals, anything that tickles my fancy.

M: 主要是的。基本上，它让我能拥有更加多样化的饮食，摄入种类丰富得多的营养，因为你看，我早上的果汁里可不只是水果。我还可以加蔬菜、坚果、酸奶、谷物，任何我喜欢的东西都行。

p-5-5 原文

W: But how did this change happen? In about 10 years, Berkton has gone from a relatively unheard-of sleepy village to a must-see destination.

W: 但这种变化是如何发生的呢？大约10年的时间里，伯克顿从一个相对默默无闻、寂静沉睡的村庄，变成了一个必游之地。

查看该段公开来源

p-5-6 原文

M: Yes, the change has truly been remarkable. Berkton was always fortunate to be endowed with such a beautiful natural allure. The Ambury Hills above

the village remain untouched by human development, and the Sonora Valleyjust below it is equally stunning. The transformation commenced in a townhall meeting in spring 2008 over 10 years ago now, when an overwhelmingmajority of neighbors voted in favor of "Motion 836". This legislativeproposal essentially set out to harmonize the aesthetic appearance of allthe houses in Berkton. The idea was that if all the properties looked acertain way with shared design features, then a village as a whole wouldlook more beautiful. And it worked.

M: 是的，这种变化确实非常显著。伯克顿一直很幸运，拥有如此美丽的自然风光。村庄上方的安布里山丘仍未受到人类开发，而下方的索诺拉谷同样美不胜收。这场转变始于十多年前，也就是2008年春天的一次市政厅会议。当时，绝大多数居民投票赞成了“第836号动议”。这项立法提案的核心目标，是让伯克顿所有房屋的外观风格协调统一。这个想法是，如果所有房产都采用某种统一的外观和共同的设计元素，那么整个村庄看起来就会更加美丽。事实证明，这确实奏效了。

查看该段公开来源

p-5-7 原文

W: It certainly did. I'm looking now at a before-and-after photo, and the change is truly remarkable. It's hard to believe it's the same place. And how do the neighbors feel now?

W: 确实如此。我现在正在看一张改造前后的照片，这种变化真的非常显著。很难相信这是同一个地方。那么，居民们现在对此有什么感受呢？

Questions 9 to 11 are based on the passage you have just heard.

p-9-1 原文

Researchers in the US have created a remote-controlled robot that is so small it can walk on the top of a US penny. In research published in the journal Science Robotics, a team at Northwestern University said the crab-like robot is 0.5mm wide. Researchers described it as the smallest-ever remote-controlled walking robot.

美国研究人员研制出一种遥控机器人，小到可以在一枚美国一美分硬币的顶部行走。在《科学机器人学》杂志发表的一项研究中，西北大学的一个团队表示，这种蟹状机器人宽度仅为0.5毫米。研究人员称，这是迄今为止最小的遥控行走机器人。

查看该段公开来源

p-9-2 原文

The tiny robot can bend, twist, crawl, walk, turn, and even jump without the use of complex hardware or special power. The engineers said this is because the robot is powered by the elastic property of its body. To construct the robot, the researchers used a shape-memory alloy material that transforms to its remembered shape when heated.

这种微型机器人无需复杂的硬件或特殊动力，就能弯曲、扭转、爬行、行走、转弯，甚至跳跃。工程师表示，这是因为机器人依靠其身体的弹性特性驱动。为了制造这种机器人，研究人员使用了一种形状记忆合金材料，这种材料受热后会恢复到其记忆中的形状。

查看该段公开来源

p-9-3 原文

Using a laser, the team is able to heat the robot at specific parts of its body, causing it to change shape. As the robot deforms and goes back to its original shape, it creates movement from one place to another. "Because

these structures are so tiny, the rate of cooling is very fast," projectlead Professor John A. Rogers said. "In fact, reducing the sizes of theserobots allows them to run faster."

团队利用激光加热机器人身体的特定部位，使其发生形变。当机器人变形并恢复到原来的形状时，就会产生从一个地方移动到另一个地方的运动。项目负责人约翰·A·罗杰斯教授说："由于这些结构非常微小，冷却速度非常快。事实上，缩小这些机器人的尺寸可以使它们运行得更快。"

查看该段公开来源

p-9-4 原文

While the research is still in the exploratory phase, the team believes that technology could lead to micro-sized robots that can perform practical tasks in tightly confined spaces. "You might imagine micro-robots as agents to repair or assemble small structures or machines in industry or as surgical assistants to clear clogged arteries, to stop internal bleeding, or to eliminate cancerous tumours-all in minimally invasive procedures," Rogers said.

尽管这项研究仍处于探索阶段，但团队相信，这项技术可能促成能够在极其狭窄空间内执行实际任务的微型机器人。罗杰斯说："你可以设想，微型机器人可作为执行者，在工业领域维修或组装微小的结构或机器；也可以作为手术助手，在微创手术中清除堵塞的动脉、止住内出血或消除癌性肿瘤。"

Questions 12 to 15 are based on the passage you have just heard.

p-12-1 原文

I don't want to boast or anything, but I have always considered myself something of an elite sleeper. Given the opportunity, I will sleep for marathon stretches, and can doze through the most extreme situations. On one very rough ferry crossing, on the route to the Isles of Scilly, for example, my traveling companion spent the entire 3-hour-ride throwing up in the bathroom, while I dozed happily on a plastic chair.

我不想自夸什么的，但我一直认为自己算得上是睡眠精英。只要有机会，我就会一睡数小时，甚至在最极端的情况下也能打瞌睡。例如，在一次前往锡利群岛的航线上，渡轮经历了一段非常颠簸的航程，我的同伴在整个3小时的旅途中都待在卫生间里呕吐，而

我却惬意地坐在塑料椅上打盹。

查看该段公开来源

p-12-2 原文

Unfortunately, it has come to my attention that I am not an elite sleeper after all. It seems I am just lazy, because elite sleepers are defined as the approximately 3 percent of the population who are biologically programmed to need less sleep than the rest of us. According to a study that came out in March, elite sleepers have rare genetic changes, which means they can sleep fewer hours than mere mortals, without any risk of cognitive decline.

遗憾的是，我最近才意识到自己终究算不上睡眠精英。看来我只是懒，因为睡眠精英的定义是：约占总人口3%、在生理上注定比我们其他人需要更少睡眠的人。根据一项于3月公布的研究，睡眠精英存在罕见的基因变化，这意味着他们睡眠时间少于普通人，却不会面临认知能力下降的风险。

查看该段公开来源

p-12-3 原文

It may not be possible to change your own genes, but can you train yourself to need less sleep? Is there a non-biological way to reach elite sleeper status? I have spent the past year trying to answer that question. Not for fun, I should add, but because having a baby has severely disrupted my sleep, for which I still have a great passion.

改变自己的基因或许不可能，但你能训练自己减少睡眠需求吗？有没有一种非生物学的方法可以成为睡眠精英？过去一年里，我一直在努力回答这个问题。需要补充说明的是，这并不是为了好玩，而是因为生孩子严重打乱了我的睡眠，而我至今仍然非常热爱睡觉。

查看该段公开来源

p-12-4 原文

For a while, I assumed I'd be forced to become one of those people who jump out of bed at the crack of dawn. After a year of tough scientific study, however, I have discovered being forced to get up early in the morning is very different from being an early bird.

有一段时间，我以为自己不得不变成那种天一亮就从床上跳起来的人。然而，经过一年的艰苦科学研究，我发现，被迫早起与早起的人是两回事。

Questions 16 to 18 are based on the recording you have just heard.

p-16-1 原文

If you read an article about a controversial issue, do you think you'd realise if it had changed your beliefs? No one knows your own mind like you do-it seems obvious that you would know if your beliefs had shifted. And yet a new paper in the Quarterly Journal of Experimental Psychology suggests that we actually have very poor awareness of our own belief change, meaning that we will tend to underestimate how much we've been swayed by a convincing article.

如果你读了一篇有关争议性问题的文章，你认为自己会意识到它是否改变了你的信念吗？没有人比你更了解自己的想法--你似乎理所当然会知道自己的信念是否发生了变化。然而，《实验心理学季刊》发表的一篇新论文表明，我们实际上很难觉察到自己的信念变化，这意味着我们往往会低估自己受一篇有说服力的文章影响的程度。

查看该段公开来源

p-16-2 原文

The researchers recruited over two hundred undergraduates across two studies and focused on their beliefs about whether physical punishment of kids is an effective form of discipline. The students reported their initial beliefs about whether physical punishment is an effective way to discipline a child on a scale from "1" completely disbelieve to "9" completely believe. Several weeks later they were given one of two research-based texts to read: each was several pages long and either presented the arguments and data in favour of physical punishment or against it. After this, the students answered some questions to test their comprehension and memory of the text. Then, the students again scored their belief about whether physical punishment is effective or not. Finally, the researchers asked them to recall what their belief had been at the start of the study.

研究人员在两项研究中招募了两百多名本科生，重点考察他们对于体罚孩子是否是一种有效管教方式的看法。学生们首先在“1”（完全不相信）到“9”（完全相信）的量表上报告自己对于体罚是否是管教孩子的有效方式的初始看法。几周后，他们被安排阅读两篇基于研究的文章中的一篇：每篇文章都有数页之长，分别陈述支持或反对体罚的论据和数据。读完后，学生们回答了一些问题，以测试他们对文章内容的理解和记忆。随后，学生们再次对自己认为体罚是否有效进行评分。最后，研究人员要求他们回忆研究开始时自己的看法。

查看该段公开来源

p-16-3 原文

The students' belief about physical punishment changed when they read a text that argued against their own initial position. Crucially, the memory of their initial belief was shifted in the direction of their new belief-in fact, their memory was closer to their current belief than their original belief. The more their belief had changed, the larger this memory bias tended to be, suggesting the students were relying on their current belief to deduce the initial belief. The memory bias was unrelated to the measures of how well they'd understood or recalled the text, suggesting these factors didn't play a role in memory of initial belief or awareness of belief change.

当学生们读到一篇主张反对其最初立场的文章时，他们对于体罚的看法发生了变化。关键在于，他们对自己初始看法的记忆也朝着新看法的方向发生了偏移--事实上，他们记忆中的初始看法比起原先的看法，更接近当前的看法。他们的看法变化越大，这种记忆偏差通常也越大，这表明学生们可能是在依靠当前的看法来推断最初的看法。记忆偏差与他们对文章的理解程度或回忆程度无关，这说明这些因素并未影响他们对初始看法的记忆，也未影响他们对信念变化的觉察。

查看该段公开来源

p-16-4 原文

The researchers concede that this research was about changes to mostly moderate beliefs-it's likely the findings would be different in the context of changes to extreme or deeply held beliefs. However, our beliefs on most topics are in the moderate range, and as we go about our daily lives reading informative material, these intriguing findings suggest we are mostly ignorant of how what we just read has updated and altered our own position.

研究人员承认，这项研究考察的是主要处于中等程度的信念变化--如果是在极端或根深蒂固的信念发生变化的情况下，研究结果很可能会有所不同。然而，我们对大多数问题的看法都处于中等范围，而且当我们在日常生活中阅读信息性材料时，这些耐人寻味的发现表明，我们大多没有意识到刚刚读到的内容如何更新并改变了自己的立场。

Questions 19 to 21 are based on the recording you have just heard.

p-19-1 原文

As the American population grows, so does the number of American moms. But, more than a century after Mother's Day became an official holiday, even as that number increases, the share of the American population who are mothers is at the lowest point in a quarter century.

随着美国人口增长，美国母亲的人数也在增加。但是，在母亲节成为法定节日一个多世纪之后，尽管这一人数不断上升，母亲在美国总人口中所占的比例却处于四分之一世纪以来的最低点。

查看该段公开来源

p-19-2 原文

It's frequently noted that fertility rates are falling sharply in richer countries. But the less-observed consequence of this trend is that the decline in births can also mean a decline in motherhood in America. According to my analysis of data from the Census Bureau, the decline of American motherhood is real, occurring very quickly, and may continue for some time yet.

人们经常注意到，较富裕国家的生育率正在急剧下降。然而，这一趋势一个较少被关注的后果是，出生人数减少也可能意味着美国母亲人数的减少。根据我对人口普查局数据的分析，美国母亲人数的下降确实存在，发生得非常迅速，而且可能还会持续一段时间。

查看该段公开来源

p-19-3 原文

Not only are moms making up less of the population, but their characteristics are changing too, and in a way that might be linked to their proportional decline. Moms today tend to be older than in the past. Just looking at recent years, the change in age-specific birth rates has

been drastic.

母亲不仅在总人口中所占的比例越来越低，她们的特征也在发生变化，而且这种变化可能与她们比例上的下降有关。如今的母亲往往比过去年长。仅从近几年来看，不同年龄段的生育率变化就十分显著。

查看该段公开来源

p-19-4 原文

In just the past few years, the peak childbearing age range for American women has advanced from that of 25-29 to that of 30-34. Meanwhile, childbearing among women under 20 has fallen by half or more, while childbearing among women 35 and older is rising.

就在过去几年中，美国女性生育高峰年龄段已从25至29岁推移到30至34岁。同时，20岁以下女性的生育率下降了一半甚至更多，而35岁及以上女性的生育率正在上升。

查看该段公开来源

p-19-5 原文

One positive consequence of this age shift is that a larger proportion of new mothers are economically prepared to raise children. Less positively, however, many women find that, as they age, they can't have as many kids as they would like. Plus, having children later in life can increase the risk of health complications. These finer points aside, one major consequence of the older-moms trend is that fewer years of a woman's life are spent as a mother. This means that, at any given time, a larger share of women, and thus of the whole population, will report not having children in government surveys. In other words, later motherhood means less motherhood.

这一年龄变化带来的一个积极后果是，新生母亲中有更大比例在经济上已做好抚养孩子的准备。然而，不那么积极的是，许多女性发现，随着年龄增长，她们无法生育自己希望拥有的那么多孩子。此外，晚年生育还会增加出现健康并发症的风险。撇开这些更细致的问题不谈，母亲年龄增长趋势的一个主要后果是，女性一生中作为母亲度过的年数减少了。这意味着，在任何特定时点，接受政府调查的女性中，以及因此在全部人口中，报告自己没有孩子的人所占比例都会更高。换句话说，晚育意味着较少的母亲经历。

查看该段公开来源

p-19-6 原文

Even as motherhood rates decline, Mother's Day, of course, will endure. In fact, despite the demographic shift, retail spending on the holiday appears to be rising. It is hard to say if Mother's Day spending is rising more than one would expect, given that the American population keeps growing, but one factor might be that the proportion of women who are the mothers of adult children is rising. And those adult children may spend more generously when it comes to celebrating the moms they no longer live with.

即使母亲比例正在下降，母亲节当然仍将延续下去。事实上，尽管人口结构发生了变化，这一节日的零售消费似乎正在增加。很难说母亲节消费的增长是否超出了美国人口持续增长这一因素所能带来的预期，但其中一个原因可能是，成年子女的母亲在女性中的比例正在上升。而这些成年子女在庆祝那些已经不再与自己共同生活的母亲时，可能会更加慷慨。

Questions 22 to 25 are based on the recording you have just heard.

p-22-1 原文

Since NASA published a paper in 1989 claiming that houseplants can soak up pollution and toxic chemicals, businesses and homeowners have increasingly invested in greenery to help clean their air. But, a new analysis suggests it could actually take more than 1,000 plants per square meter to gain a benefit any greater than simply opening a couple of windows.

自美国国家航空航天局（NASA）于1989年发表一篇论文，声称室内植物能够吸收污染物和有毒化学物质以来，企业和房主越来越多地投资于绿植，以帮助净化空气。然而，一项新的分析表明，要获得任何超过简单打开几扇窗户所能带来的益处，实际上可能需要每平方米摆放超过1000株植物。

查看该段公开来源

p-22-2 原文

The problem lies in the fact that NASA conducted their tests in sealed containers that do not simulate the conditions in most people's homes or offices. The space agency was primarily concerned about keeping the air fresh for astronauts cut off in biospheres or space stations and helping to combat "sick building syndrome", which had become a problem due to the super insulated and energy efficient offices of the late 1970s. By the

early 1980s, workers regularly complained of skin rashes, sleeplessness,headaches, and allergies as they breathed in toxic chemicals from paintsand plastics.

问题在于，NASA是在密封容器中进行测试的，而这种环境并不能模拟大多数人家中或办公室的实际情况。该航天机构主要关注的是如何为被隔绝在生物圈或空间站中的宇航员保持空气清新，以及帮助应对“病态建筑综合征”。由于20世纪70年代末的办公室采用了高度隔热且节能的设计，这种综合征逐渐成为一个问题。到了20世纪80年代初，员工经常抱怨出现皮疹、失眠、头痛和过敏症状，因为他们吸入了来自油漆和塑料的有毒化学物质。

查看该段公开来源

p-22-3 原文

NASA found that certain plants could remove chemicals from the air, and even today, garden centers recommend the plants for air cleaning properties. However, a new evaluation of dozens of studies spanning 30 years found that houseplants in a normal environment have little impact. In fact, natural ventilation is far better at cleaning the air. The researchers also calculated the clean air delivery rate for plants in the studies they analyzed and found that the rate at which plants disperse the compounds was well below the usual rate of air exchange in a normal building, caused by the movement of people coming and going, opening doors and windows.

NASA发现，某些植物能够去除空气中的化学物质，直到今天，园艺中心仍会因这些植物具有净化空气的功效而予以推荐。然而，一项对历时30年、涵盖数十项研究的新评估发现，在正常环境中，室内植物的影响微乎其微。事实上，自然通风在净化空气方面要有效得多。研究人员还计算了所分析研究中植物的清洁空气输送率，发现植物分散这些化合物的速率远低于普通建筑通常的空气交换速率；后者是由人员进出以及开关门窗等活动造成的。

查看该段公开来源

p-22-4 原文

Many of the studies did show a reduction in the concentration of volatile organic compounds over time, which is likely why people have seized on them to praise the air purifying virtues of plants. But the researchers' calculation showed it would take 10 to 1,000 plants per square meter of

floor space to compete with the air cleaning capacity of a building's airhandling system or even just a couple of open windows in a house. Incontrast, NASA's sealed experiment recommended one pot plant per 100 squarefeet.

许多研究确实显示，挥发性有机化合物的浓度会随着时间推移而降低，这可能就是人们抓住这一点来赞美植物净化空气功效的原因。但研究人员的计算表明，要与建筑空气处理系统，甚至住宅中仅仅打开几扇窗户的空气净化能力相匹敌，每平方米地面面积需要摆放10至1000株植物。相比之下，NASA的密封实验建议每100平方英尺摆放一盆植物。

查看该段公开来源

p-22-5 原文

This is certainly an example of how scientific findings can be misleading or misinterpreted over time. But it's also a great example of how scientific research should continually reexamine and question findings to get closer to the ground truth of understanding what's actually happening.

这无疑说明，科学发现可能会随着时间推移而产生误导或被误解。但这也很好地体现了科学研究应当不断重新审视并质疑已有发现，从而更加接近对实际情况的真实理解。

Questions 9 to 11 are based on the passage you have just heard.

p-9-1 原文

Logging into your email account can sometimes feel like trying to hack into the Pentagon. If you follow all of the guidelines, you need to use a different password for every one of your accounts; use an incomprehensible variety of letters, numbers, and symbols; sign up for two-step verification; and change every password every time one of them is compromised. More often than not, you then have to choose photos that

include a street sign, as this apparently provides solid evidence to yourcomputer that you are, in fact, a human being.

登录电子邮箱账户有时感觉就像试图入侵五角大楼。如果遵循所有指南，你需要为每个账户使用不同的密码；使用由字母、数字和符号组成的令人难以理解的组合；注册两步验证；并且每当其中一个密码遭到泄露时，就更改所有密码。更常见的是，接下来你还必须选择包含街道标志的照片，因为这显然能向电脑提供确凿证据，证明你确实是人类。

查看该段公开来源

p-9-2 原文

It's no small wonder most of us forget our passwords more often than our keys. Now a new peer-reviewed study by researchers at Aalto University in Finland is attempting to figure out why we forget our passwords in order to help put an end to this frustrating phenomenon. Their findings suggest that how likely you are to remember your password has less to do with the password itself and more to do with how often you anticipate using it. Which is to say: you are far more likely to remember a complicated password if you know you'll frequently be using it to log into an account than you are to remember a simple password for an account that you don't expect to log into very often. The researchers advise websites to include more of an incentive for users to log in more often in order to help them remember their secret codes.

难怪我们大多数人忘记密码的次数比忘记钥匙的次数还多。如今，芬兰阿尔托大学的研究人员开展了一项新的同行评议研究，试图弄清我们为何会忘记密码，以帮助终结这一令人沮丧的现象。他们的研究结果表明，你记住密码的可能性有多大，与密码本身的关系较小，而更多地取决于你预期使用它的频率。也就是说，如果你知道自己会经常使用一个复杂密码登录某个账户，那么你记住它的可能性要远高于记住一个简单密码的可能性，后者所对应的账户是你预计不会经常登录的。研究人员建议网站为用户更频繁登录提供更多激励，以帮助他们记住自己的密码。

Questions 12 to 15 are based on the passage you have just heard.

p-12-1 原文

Four years ago, Jenny Weiner was in a fitness slump. She wanted to improve her physical and mental health. However, her workouts lacked intensity

without a proper training programme to follow. When she went to the gym,her daily ritual predominantly involved easy exercise options like jogging;she avoided more formidable exercises like lifting weights. A personaltrainer who might push her was out of the question. The extravagant costwas just unaffordable. She then discovered the fitness phone appSlimmeretics. To use the app, you first input your profile about yourprevious training experiences and preferences, as well as your desiredgoals. A virtual coach then uses that information to suggest a personalisedtraining regime. After the workout, the app's artificial intelligencesoftware system gives feedback from Ms. Weiner and its other 53 millionusers around the world to adjust future training sessions. Now Ms. Weinerfinds the workouts exciting. This is because no two are ever the same. As aresult, the app has helped her to lose more than 25 kilograms. The app'smathematical approach can arrange a more meticulous workout schedule. Thishas led to optimal results. However, some experts think that apps cannotreplace human personal trainers. An app cannot understand human behavior.It will not comprehend that there are competing interests outside of healthand fitness. Additionally, a human trainer can add compassion to theworkout. He can also make exercise fun and sustainable. Trainers canmonitor whether a person is doing exercises correctly. This can safeguardagainst injuries. An app cannot perceive such subtleties.

四年前，Jenny Weiner 的身体状况正处于低谷。她希望改善自己的身心健康。然而，由于没有适当的训练计划可供遵循，她的锻炼缺乏强度。她去健身房时，每天的锻炼主要都选择慢跑之类的轻松项目；而像举重这样更具挑战性的运动，她则避而远之。请一位能够督促她的私人教练更是不可能的事，因为高昂的费用实在负担不起。后来，她发现了健身手机应用 Slimmeretics。要使用这款应用，首先需要输入个人资料，包括以往的训练经历和偏好，以及期望达到的目标。随后，虚拟教练会利用这些信息为用户制定个性化的训练方案。锻炼结束后，这款应用的人工智能软件系统会根据 Weiner 女士以及全球其他5300万名用户的反馈，调整未来的训练安排。如今，Weiner 女士觉得锻炼很令人兴奋。这是因为每次锻炼都不尽相同。因此，这款应用帮助她减重超过25公斤。该应用采用数学方法，可以安排更加细致周密的锻炼计划，从而取得最佳效果。然而，一些专家认为，应用程序无法取代人类私人教练。应用程序无法理解人类行为，也无法明白除了健康和健身之外，人们还会面临其他相互竞争的需求。此外，人类教练可以在锻炼中融入关怀，也能让运动变得有趣且可持续。教练可以监督一个人是否正确完成动作，从而防止受伤。应用程序无法察觉这些细微之处。

Questions 16 to 18 are based on the recording you have just heard.

p-16-1 原文

All societies are held together by seven universal moral rules, which include deferring to superiors and respecting the property of others, Oxford University has concluded. Although many cultures are moving towards more liberal, less hierarchical organizations, the new research suggests that traditional power structures and basic values of charity and brotherhood are the cornerstones of successful societies.

牛津大学得出结论，所有社会都由七条普遍的道德规则维系在一起，其中包括服从上级和尊重他人财产。尽管许多文化正朝着更加自由、等级制度更弱的组织形式发展，但这项新研究表明，传统的权力结构以及慈善和兄弟情谊等基本价值观，才是成功社会的基石。

查看该段公开来源

p-16-2 原文

The huge study of 60 different cultures around the world found that all communities operate under seven basic moral codes. Those universal rules are: help your family, help your group, return favors, be brave, defer to superiors, divide resources fairly, and respect the property of others. The character traits held for every kind of community, be they traditional hunter gatherers or advanced civilizations, helping to uphold civilized society and foster social cooperation, researchers found. "Everyone everywhere shares a common moral code," said Dr. Oliver Scott Curry, lead author and senior researcher at Oxford. "These seven moral rules appear to be universal across cultures, because people face the same social problems. Even if some of these traits look right-wing or conservative, for example, deferring to authority, left-wing people will still have a group loyalty and deference to someone or something. This shows there really is more that unites us than divides us."

这项针对世界各地60种不同文化的大规模研究发现，所有群体都遵循七项基本的道德准则。这些普遍规则是：帮助家人，帮助群体，回报他人的帮助，勇敢，服从上级，公平分配资源，以及尊重他人的财产。研究人员发现，无论是传统的狩猎采集者群体，还是先进文明，各类社会都重视这些品格；这些品格有助于维护文明社会并促进社会合作。“每个地方的每个人都拥有共同的道德准则，”牛津大学首席作者兼高级研究员奥利弗

·斯科特·柯里博士说，“这七条道德规则之所以在不同文化中都具有普遍性，是因为人们面临着相同的社会问题。即便其中一些品格看起来属于右翼或保守立场，例如服从权威，左翼人士仍然会表现出对某个群体的忠诚，以及对某个人或某种事物的服从。这表明，真正将我们联结在一起的因素多于分裂我们的因素。”

查看该段公开来源

p-16-3 原文

The study published in Current Anthropology is the largest and most comprehensive and widespread survey of morals ever conducted and aimed to find out whether different societies had different versions of morality. The team accessed the world's best archives to analyze accounts from more than 600 sources of 60 societies around the world. They found that the seven rules were considered morally good in all societies and were observed across all continents, religions and politics. However, some communities valued certain rules more highly than others. Dr. Curry hopes that this research helps to promote mutual understanding between people of different cultures and appreciation of what we have in common and how and why we differ. Co-author professor Harvey Whitehouse said social scientists should now set about testing the theory in the field, rather than relying on old data. "This study was based on historical descriptions of cultures around the world," he said. "These descriptions were made independent of and prior to the theory we're testing. In future, if social scientists are serious about testing theories of morality, they will need to gather new data, more systematically, out in the field."

这项发表于《当代人类学》的研究，是迄今开展的规模最大、最全面且覆盖范围最广的道德调查，旨在 выяс明不同社会是否拥有不同版本的道德观。研究团队查阅了世界上最权威的档案资料，分析了来自世界各地60个社会的600多份资料记载。他们发现，在所有社会中，这七条规则都被视为合乎道德的准则，并且在各大洲、各种宗教和不同政治体系中都得到遵守。不过，一些群体对某些规则的重视程度高于其他规则。柯里博士希望，这项研究能够促进不同文化之间的相互理解，帮助人们认识到彼此的共同点，以及我们存在差异的方式和原因。合著者哈维·怀特豪斯教授表示，社会科学家现在应当着手在实地检验这一理论，而不是依赖旧数据。他说：“这项研究建立在对世界各地文化的历史描述之上。这些描述是在独立于我们所检验的理论、且早于该理论提出的情况下形成的。今后，如果社会科学家认真对待道德理论的检验，就需要在实地以更加系统的方式收集新数据。”

Questions 19 to 21 are based on the recording you have just heard.

p-19-1 原文

When it comes to food, color is money. Food companies know that better color gives better prices, so they ensure that their products are attractive in color to bolster earnings. Oranges, for example, have to meet specific color standards. And oranges are just the beginning. There are color standards for foods including French fries, tomatoes, pumpkins, olives, honey and cherries.

说到食品，颜色就是金钱。食品公司深知，颜色越好，价格就越高，因此它们会确保产品的色泽具有吸引力，以增加收益。例如，橙子必须符合特定的色泽标准。而橙子还只是开始。包括炸薯条、西红柿、南瓜、橄榄、蜂蜜和樱桃在内的食品，都有相应的色泽标准。

查看该段公开来源

p-19-2 原文

The attention to color is for good reason. For all the talk of the tongue, our eyes really might be the most important part of the eating experience. A great number of our brain functions are dedicated to processing vision, while only a percent or two is given over to taste faculties, and the result is that color actually changes how we taste food.

人们之所以如此重视颜色，是有充分理由的。尽管人们总是在谈论舌头，但我们的眼睛实际上可能是饮食体验中最重要的部分。我们大脑的大量功能都用于处理视觉信息，而分配给味觉功能的只有百分之一或百分之二，其结果是，颜色确实会改变我们品尝食物时的感受。

查看该段公开来源

p-19-3 原文

Scientists have demonstrated many times the importance of color to taste. In a 1980s study, for example, test participants were asked to name the flavor of the beverage they were drinking without being able to see that beverage. Only one in five was able to identify it as orange. But when they were allowed to see what they were drinking which was orange in color, each of them identified the orange flavor. And when a drink that was lime flavor was colored orange, nearly half of respondents identified the flavor of the

beverage as orange. None made that mistake when the beverage was green incolor. What's happening when someone fails to identify the flavor of abeverage they can't see or that has an abnormal color? Is it thatparticipants can't discern what the flavor is, and so rely on visual cues?Or does color actually change the experience of taste? The key to thesequestions is the effect of color on expectation. The brain makespredictions using color. These predictions rely on expectations that comefrom experience. Research shows that we're all born liking sweet things anddesire to eat them, but we aren't born knowing what the sweet things wecrave look like. So we need to learn this over time. The brain getsinformation from the environment. And we learn, for example, that fruits gofrom green and sour to red and ripe and sweet. Thus, if we see a greenberry, we equate its color with a sour taste, and just looking at a redfruit will activate our expectations that it will taste sweet and delicious.

科学家多次证明了颜色对味觉的重要性。例如，在20世纪80年代的一项研究中，实验参与者被要求说出所饮用饮料的味道，但他们无法看到饮料本身。只有五分之一的人能够辨认出那是橙子味。然而，当他们可以看到自己所饮用的饮料，而饮料呈橙色时，每个人都辨认出了橙子味。当一杯青柠味饮料被染成橙色时，近一半的受访者将饮料的味道辨认为橙子味。而当饮料呈绿色时，没有人犯这样的错误。当一个人无法辨认出自己看不见的饮料，或颜色异常的饮料的味道时，究竟发生了什么？是因为参与者无法分辨出它是什么味道，所以依赖视觉线索吗？还是颜色确实改变了味觉体验？这些问题的关键在于颜色对预期的影响。大脑会利用颜色作出预测，而这些预测依赖于来自经验的预期。研究表明，我们生来就喜欢甜食，也渴望食用甜食，但我们并不是天生就知道自己渴望的甜食看起来是什么样子。因此，我们需要随着时间的推移逐渐学会这一点。大脑从环境中获取信息。例如，我们会了解到，水果会从绿色、酸涩变成红色、成熟和甜美。因此，如果我们看到一颗绿色的浆果，就会将其颜色与酸味联系起来；而仅仅看到一个红色的水果，就会激活我们对其味道甜美可口的预期。

Questions 22 to 25 are based on the recording you have just heard.

p-22-1 原文

Searching for meaning is something many of us experience throughout our lives. For some, this meaning is religious, some political and some interpersonal. And having a sense of meaning can bring us happiness.

寻找意义是我们许多人一生都会经历的事情。对一些人来说，这种意义是宗教上的；对一些人来说，是政治上的；对另一些人来说，则是人际关系方面的。而拥有意义感能够带给我们幸福。

查看该段公开来源

p-22-2 原文

A new study looks at the relationship between meaning and happiness in the context of financial resources. Rhea Catapano from the University of Toronto and colleagues find meaning is a far weaker predictor of happiness for rich people than poorer people, suggesting economic resources can impact how we experience meaning. The team analysed data from over 500,000 people across 123 countries. The first study used data from a daily poll of US residents collected between 2013 and 2015. Well-being was tracked using measures of positive affect-whether, during the day before they were surveyed, participants had smiled or laughed a lot or experienced a lot of happiness. Meaning was measured through a daily "purpose index", which explored the extent to which participants felt that they like what they do every day and are motivated to achieve their goals. Finally, income levels were assessed. The results showed that the correlation between meaning and happiness was strongest among those in lower income brackets. But as income levels increased, the correlation became weaker. The second study looked at worldwide data. Happiness was measured using the same questions as in the first study, while meaning was measured using the single question: "Do you feel your life has an important purpose or meaning?" Again, the strength of the relationship between meaning and happiness depended on participants' income: meaning had a greater influence on happiness for those on lower incomes compared to those in higher brackets. In the final study, French participants indicated the extent to which they felt they led a purposeful and meaningful life and how much they considered themselves a happy person. Finally, rather than using specific income brackets, they placed themselves on a "social ladder", representing where they stand in society with regard to wealth, education, and career. The results from the study duplicated those of the first two.

一项新研究考察了在财务资源背景下意义与幸福之间的关系。多伦多大学的里娅·卡塔帕诺及其同事发现，对于富裕人群而言，意义是幸福感的预测因素，其作用远弱于对较贫困人群的作用，这表明经济资源可能会影响我们体验意义的方式。研究团队分析了来

自123个国家的50多万人的数据。第一项研究使用了2013年至2015年间收集的美国居民每日民意调查数据。研究人员通过积极情绪指标追踪幸福感，即调查前一天，参与者是否曾多次微笑或大笑，或体验到很强的幸福感。意义感则通过每日的“目标指数”进行测量，该指数考察参与者在多大程度上觉得自己喜欢每天所做的事情，并且有动力实现自己的目标。最后，研究人员评估了收入水平。结果显示，意义与幸福之间的相关性在收入较低的人群中最强。但随着收入水平提高，这种相关性逐渐减弱。第二项研究考察了全球数据。幸福感采用与第一项研究相同的问题进行测量，而意义感则通过一个单一问题进行测量：“你是否觉得自己的生活具有重要的目标或意义？”同样，意义与幸福之间关系的强弱取决于参与者的收入：与收入较高的人群相比，意义对低收入人群幸福感的影响更大。在最后一项研究中，法国参与者表明了自己在多大程度上觉得过着有目标且有意义的生活，以及他们在多大程度上认为自己是一个幸福的人。最后，他们没有按照具体收入阶层进行划分，而是将自己置于一架“社会阶梯”上，以代表自己在社会中就财富、教育和职业而言所处的位置。该研究的结果与前两项研究的结果一致。

查看该段公开来源

p-22-3 原文

So overall, meaning and happiness had a stronger relationship in those with fewer resources than those with more. This might be the case because rich individuals have more access to other sources of happiness-many of which will be external, like lack of stress or community. Thus, a focus on an internal sense of satisfaction, purpose or meaning is less important.

总的来说，资源较少的人群中，意义与幸福之间的关系比资源较多的人群更强。这可能是因为富裕人士更容易获得其他幸福来源，其中许多来源是外部的，例如较少的压力或社区支持。因此，对内在满足感、目标感或意义感的关注就没有那么重要了。

Questions 9 to 11 are based on the passage you have just heard.

p-9-1 原文

Increased television time for young children has long been linked with poorer progress in some areas of development. One possible way to counter those negative effects is talking while watching the screen. As a new study suggests, the more parents engaged in conversation with preschoolers during TV time, the more likely those children were to have higher curiosity levels when they reached kindergarten. This was particularly true for children with socioeconomic disadvantages.

长期以来，幼儿看电视时间增加一直与其在某些发展领域进步较差有关。抵消这些负面影响的一种可能方式是在观看屏幕时进行交谈。一项新研究表明，父母在电视时间与学龄前儿童进行的对话越多，这些儿童进入幼儿园时表现出较高好奇心水平的可能性就越大。对于处于社会经济劣势的儿童而言，这一点尤其明显。

查看该段公开来源

p-9-2 原文

"Our findings reinforce the importance of parent conversation to promote early childhood development and curiosity," said lead author Prachi Shah at University of Michigan Health C.S. Mott Children's Hospital. Researchers assessed hours of daily television exposure and frequency of parent-screen-time conversation among 1,500 preschoolers, and then measured early childhood curiosity in kindergarten. The study specifically focused on curiosity levels, which are associated with enhanced learning and higher academic achievement in reading and math at kindergarten, and behavioral-developmental benefits, especially for children from families with lower socioeconomic status. While many young children are now growing up with digital media exposure through mobile devices like tablets and phones, television remains a dominant screen activity, accounting for 72% of all screen time. TVs are in 98% of all homes, keeping television exposure a relevant developmental context in young children.

密歇根大学健康中心C.S.莫特儿童医院的首席作者普拉奇·沙阿说：“我们的研究结果进一步证明，父母的对话对于促进幼儿早期发展和好奇心十分重要。”研究人员评估了1500名学龄前儿童每天接触电视的时长，以及父母在屏幕使用期间与孩子交谈的频率，随后测量了这些儿童进入幼儿园时的早期好奇心。该研究特别关注好奇心水平，因为好奇心与幼儿园阶段更强的学习能力、更高的阅读和数学学业成就，以及行为和发展方面的益处相关，尤其是对来自社会经济地位较低家庭的儿童而言。如今，许多幼儿通过平板电脑和手机等移动设备接触数字媒体，但电视仍然是主要的屏幕活动，占全部屏幕使用时间的72%。所有家庭中有98%拥有电视，这使电视接触仍然是幼儿发展中一个重要的环境因素。

查看该段公开来源

p-9-3 原文

Excessive media exposure, including television, can displace exploratory activities such as play and parent-child interactions, which are believed to be key to cultivating curiosity in kids. "Our findings suggest the importance of parents finding opportunities to foster conversational exchanges in daily routines with their young children-including while watching television," Shah said.

过度接触媒体，包括看电视，可能会挤占游戏和亲子互动等探索性活动，而这些活动被认为是培养儿童好奇心的关键。沙阿说：“我们的研究结果表明，父母应当在日常生活中寻找机会与幼儿进行对话交流，包括在观看电视时进行交流。”

Questions 12 to 15 are based on the passage you have just heard.

p-12-1 原文

Humans are aspirational goal-seeking beings. Each of us, according to research, has an inborn drive to acquire. The "dark side" of this drive to acquire is being mindlessly driven to possess more and more "things" and to socially compare our "stuff" with all the stuff other people have in their lives. So the question is, how do we ensure we tap into our drive to acquire in positive ways that will benefit our well-being?

人类是有抱负、追求目标的存在。研究表明，我们每个人天生都具有获取的驱动力。这种获取驱动力的“阴暗面”，在于不假思索地驱使自己拥有越来越多的“东西”，并将自己的“财物”与他人生活中拥有的一切进行社会比较。因此，问题在于，我们该如何

确保以积极的方式运用这种获取驱动力，从而增进自身的幸福感？

查看该段公开来源

p-12-2 原文

One way is to become more intentionally aspirational. To be intentionally aspirational includes consciously aspiring to be the person you need to be to succeed in your professional and personal life. It also includes consciously aspiring to acquire things in your life that will positively impact your sense of well-being. If you're not consciously, mindfully and intentionally harnessing this inborn drive to acquire, you might be mindlessly pursuing all the wrong things.

一种方法是更加有意识地树立抱负。有意识地树立抱负，包括自觉追求成为一个能够在职业生活和个人生活中取得成功所需要成为的人。这也包括自觉追求获得生活中那些能够积极影响你幸福感的事物。如果你没有有意识、专注而明确地驾驭这种与生俱来的获取驱动力，就可能会在不假思索地追求所有错误的事物。

查看该段公开来源

p-12-3 原文

While your intentional aspirational goals will include pursuit of acquiring things that will increase your sense of well-being, they ought to also include goals to help other people in your various life roles. Your intentional aspirational goals will also include striving to be your personal best-a person of "good" character, integrity, and trustworthiness.

虽然你有意识树立的抱负目标会包括追求获得能够提升幸福感的事物，但这些目标也应包括在你所承担的各种生活角色中帮助他人的目标。你有意识树立的抱负目标还应包括努力做到最好的自己，成为一个具有“良好”品格、正直而值得信赖的人。

查看该段公开来源

p-12-4 原文

Think about this from a practical, rather than theoretical viewpoint. If you're not pursuing intentional aspirational goals, you have nothing to strive for. If you have nothing to strive for, you're putting yourself in the dangerous position of simply drifting through life, and you will not be able to experience, live and enjoy all that life has to offer.

请从实际而非理论的角度思考这一点。如果你没有追求有意识树立的抱负目标，就没有任何目标可供努力。如果你没有任何目标可供努力，就会使自己处于一种危险境地，只是在生活中随波逐流，也就无法体验、生活并享受人生所能提供的一切。

p-16-2 原文

Coffee can have numerous benefits. However, while coffee may make you more alert, individuals can build up a tolerance, meaning this is short-lived. Coffee can also increase blood sugar and eventually cause lack of focus and energy. It's also worth noting that people react differently to coffee. Some people can drink it at midnight and go straight to sleep, whereas others get feelings of anxiety after a small amount. Also remember that coffee from a coffee shop may be stronger than coffee made at home. So stop drinking coffee by 2 pm and have a maximum of 2 cups of coffee a day, but be aware of your own reaction to it.

咖啡有许多益处。然而，虽然咖啡可能会让你更加警觉，但人们会逐渐产生耐受性，这意味着这种效果是短暂的。咖啡还会升高血糖，最终导致注意力和精力不足。同样值得注意的是，人们对咖啡的反应各不相同。有些人可以在午夜喝咖啡后直接入睡，而另一些人只喝少量咖啡就会感到焦虑。还要记住，咖啡店的咖啡可能比家里冲的咖啡浓。因此，下午两点后就不要再喝咖啡了，每天最多喝两杯，但要留意自己对咖啡的反应。

p-16-3 原文

Whole grain foods will ward off hunger. Examples include porridge and whole wheat bread. Combining whole grain foods with protein will help keep your blood sugar levels balanced, which is essential for mood and concentration. Berries and nuts are a convenient and nutritious snack. Blueberries, like many dark colored fruits and vegetables, can slow down brain damage and age-related decline. Frozen berries are also a good choice. They are usually cheap, last longer and don't lose their nutrients when frozen. But flavored and coated nuts are less healthy as they contain added oil, salt, and sugar.

全谷物食品可以防止饥饿。例子包括粥和全麦面包。将全谷物食品与蛋白质搭配食用，有助于保持血糖水平平衡，而这对情绪和注意力至关重要。浆果和坚果是方便又有营养的零食。蓝莓和许多深色水果、蔬菜一样，可以减缓大脑损伤和与年龄相关的衰退。冷冻浆果也是不错的选择。它们通常价格便宜、保存时间更长，而且冷冻后不会损失营养成分。但调味坚果和裹层坚果不那么健康，因为其中含有额外添加的油、盐和糖。

p-16-4 原文

Doctors often recommend taking vitamin supplements to top up on the nutrients you need. But I would say food should always come before supplements and the key to getting as many nutrients as possible is to eat a varied diet with lots of different colors such as frozen berries and dark green vegetables. It's better to get everything you need from food and drink. For example, oranges contain not only vitamin C which boosts the immune system, but also fiber and other components that you can't get packaged together in a tablet.

医生经常建议服用维生素补充剂，以补充你所需的营养物质。但我认为，食物始终应该优先于补充剂，而获得尽可能多营养的关键，是食用包含多种不同颜色食物的多样化饮食，例如冷冻浆果和深绿色蔬菜。最好从食物和饮品中获取你所需要的一切。例如，橙子不仅含有能增强免疫系统的维生素C，还含有纤维和其他无法在一片药片中同时获得的成分。

Finally, don't skip meals. Eating regularly will help keep blood sugar balanced and feed the brain with the fuel it needs.

最后，不要不吃饭。规律进食有助于保持血糖平衡，并为大脑提供所需的能量。

Questions 19 to 21 are based on the recording you have just heard.

p-19-1 原文

The late Swedish academic Hans Rosling has identified a worrying trend: not only do many people across advanced economies have no idea that the world is becoming a much better place, but they actually even think the opposite. This is no wonder, when the news focuses on reporting catastrophes, terrorist attacks, wars, and famines.

已故瑞典学者汉斯·罗斯林发现了一个令人担忧的趋势：不仅许多发达经济体中的人们根本不知道世界正在变得越来越美好，实际上他们甚至认为情况恰恰相反。当新闻集中报道灾难、恐怖袭击、战争和饥荒时，这也就不足为奇了。

p-19-2 原文

Who wants to hear about the fact that every day some 200,000 people around the world are lifted above the $2-a-day poverty line? Or that more than 300,000 people get access to electricity and clean water for the first time every day? These stories in people in low-income countries simply don't make for exciting news coverage. But, as Rosling pointed out in his book Factfulness, it's important to put all the bad news in perspective.

谁愿意听到这样的事实：世界各地每天约有20万人脱离每日2美元的贫困线？或者每天有超过30万人首次用上电并获得清洁饮用水？这些关于低收入国家民众的故事，确实难以成为令人兴奋的新闻报道内容。但是，正如罗斯林在他的《事实》一书中指出的那样，重要的是要把所有坏消息放在整体背景下加以看待。

p-19-3 原文

While it is true that globalization has put some downward pressure on middle-class wages in advanced economies in recent decades, it has also helped lift hundreds of millions of people above the global poverty line. If we really care about global welfare, globalization is the only way forward to ensure that economic prosperity is shared among all countries and not only a select few advanced economies.

诚然，近几十年来，全球化对发达经济体中产阶级的工资造成了一定的下行压力，但它也帮助数亿人脱离了全球贫困线。如果我们确实关心全球福祉，那么全球化就是确保经济繁荣惠及所有国家，而不仅仅是少数发达经济体的唯一前进道路。

p-19-4 原文

While some people glorify the past, one of the big facts of economic history is that until quite recently a significant part of the world population has lived under quite miserable conditions-and this has been true throughout most of human history.

虽然有些人美化过去，但经济史的一大事实是，直到相当晚近的时候，世界人口中仍有相当一部分生活在十分悲惨的条件下，而这在绝大部分人类历史时期一直如此。

p-19-5 原文

While there were many long-lasting ups and downs, like the Great Depression or the recent Great Recession, the constancy of the long-run growth rate is actually quite miraculous. Low-income countries, including China and India, have been growing at a significantly faster pace in recent decades and are quickly catching up to the West. A 10% growth rate over a prolonged period means that income levels double roughly every seven years. It is obviously good news if prosperity is more shared across the globe.

尽管长期以来经历了许多持续时间较长的起伏，例如大萧条或近期的大衰退，但长期增长率的稳定性实际上相当不可思议。包括中国和印度在内的低收入国家，近几十年来一直以明显更快的速度增长，并且正在迅速追赶西方。长期保持10%的增长率，意味着收入水平大约每七年翻一番。如果繁荣能够在全球范围内得到更广泛的共享，这显然是个好消息。

p-19-6 原文

While inequality within countries has gone up as a result of globalization, global inequality has been on a steady downward trend for several decades. This is mostly a result of the improvement of hundreds of millions of people's living standards. In fact, for the first time ever since the Industrial Revolution, about half of the global population can be considered middle class.

虽然全球化导致各国内部的不平等程度上升，但几十年来，全球不平等一直呈稳步下降趋势。这主要是数亿人的生活水平得到改善的结果。事实上，这是自工业革命以来，全球人口中约有一半首次可以被视为中产阶级。

Questions 22 to 25 are based on the recording you have just heard.

p-22-1 原文

We all know that the sense of smell is powerful. The delicious scent of bread, for example, can act like a time machine. One sniff can bring back a memory from many years ago. Indeed, scent particles, in general, can revive memories that have been long forgotten. But why do smells sometimes trigger powerful memories, especially emotional ones? The short answer is that the brain regions that handle smells, memories and emotions are linked.

我们都知道，嗅觉的力量十分强大。例如，面包的诱人香气就像一台时光机。闻一下，就能唤回许多年前的一段记忆。事实上，气味分子通常能够唤醒那些早已被遗忘的记忆。但为什么气味有时会触发强烈的记忆，尤其是情感记忆呢？简而言之，负责处理气味、记忆和情感的大脑区域彼此相连。

查看该段公开来源

p-22-2 原文

A scent is a chemical particle that floats in through the nose and into the region of the brain responsible for smell, where the sensation is first processed into a form that the brain can read. Brain cells then carry that information to the area of the brain where emotions are processed, and then to an adjacent area of the brain where learning and memory formation take place.

气味是一种化学微粒，它经由鼻腔飘入大脑中负责嗅觉的区域，在那里，这种感觉首先被处理成大脑能够读取的形式。随后，脑细胞将这些信息传递到负责处理情感的大脑区域，再传递到相邻的、负责学习和记忆形成的大脑区域。

p-22-3 原文

Scents are the only sensations that travel such a direct path to the emotional and memory centers of the brain. That results in an intimate connection between emotions, memories and scents, which is why memories triggered by scents are experienced as more emotional than those triggered by sight or sound.

气味是唯一能够沿着如此直接的路径到达大脑情感中枢和记忆中枢的感觉。这就形成了情感、记忆和气味之间的密切联系，也正因如此，气味触发的记忆往往比视觉或听觉触发的记忆更具情感色彩。

p-22-4 原文

Let's take a closer look at how those memories are activated. Usually, when a person smells something that's connected to a meaningful event in their past, they'll first have an emotional response to the sensation and then a memory might follow. But sometimes, the memory doesn't come to the surface. The person might feel the emotion of something that happened in the past but won't remember what they experienced. What causes this baffling phenomenon? The explanation is context. Imagine this scenario-a person is walking down the street smelling a scent that they first encountered decades ago, which activates an emotional response. If the person had first come across that smell in a very different context, it will be much more difficult to recover the associated memory, because the brain uses the context to give meaning to the information and find that memory.

让我们更仔细地看看这些记忆是如何被激活的。通常，当一个人闻到某种与过去某个重要事件有关的气味时，他首先会对这种感觉产生情绪反应，随后记忆可能会浮现出来。但有时，记忆并不会浮现。这个人可能会感受到过去发生的某件事所带来的情绪，却想不起自己当时经历了什么。是什么导致了这种令人困惑的现象？答案在于情境。想象这样一个场景：一个人走在街上，闻到一种他几十年前第一次接触到的气味，这激活了他的情绪反应。如果这个人当初是在一个截然不同的情境中第一次闻到这种气味的，那么

他就会更难回忆起与之相关的记忆，因为大脑会利用情境赋予信息意义，并找出那段记忆。

p-22-5 原文

The special nature of memories brought back by scents notwithstanding, they have the same drawbacks as other memories. They aren't always accurate, and they can change over time. In fact, each time we remember something, that memory can become distorted. But, because of the strong emotional associations these memories evoke, people who remember something due to a scent are often convinced that the memories are accurate, even when they aren't.

尽管气味唤回的记忆具有特殊性，但它们也存在与其他记忆相同的缺陷。它们并不总是准确的，而且会随着时间发生变化。事实上，每当我们回忆某件事时，那段记忆都有可能被扭曲。但是，由于这些记忆唤起了强烈的情感联系，那些因某种气味而回忆起某件事的人往往坚信自己的记忆是准确的，即使事实并非如此。
