Questions 9 to 11 are based on the passage you have just heard.

p-9-1 原文

When a person tries to access a memory, their brains quickly examine everything stored in it to find the relevant information. But as we age, many of us have difficulty retrieving memories.

p-9-2 原文

In a review published in the journal *Trends in Cognitive Sciences* on February 11th, researchers propose an explanation for why this might be happening: the brains of older adults allocate more space to accumulated knowledge and have more material to navigate when attempting to access memories. While this wealth of prior knowledge can make memory retrieval challenging, the researchers say it has its upsides-this life experience can aid with creativity and decision-making.

研究人员在2月11日发表于《认知科学趋势》杂志的一篇综述中提出了这一现象可能发生的原因：老年人的大脑会为积累的知识分配更多空间，因此在尝试提取记忆时需要在更多内容中进行搜索。研究人员表示，尽管这些丰富的既有知识会使记忆提取变得更具挑战性，但它也有积极的一面--这些人生经历能够帮助人们进行创造和决策。

查看该段公开来源

p-9-3 原文

Researchers Tarek Amer, Jordana Wynn and Lynn Hasher looked at several behavioral and brain imaging studies, which show that older adults have difficulty suppressing information that is no longer relevant and that when searching for a specific memory, they often retrieve other, irrelevant memories along with it. The studies also showed that when given a cognitive task, older adults rely more heavily on previous knowledge than younger adults do.

研究人员塔雷克·阿梅尔、乔丹娜·温和林恩·哈舍尔考察了多项行为研究和脑成像研究。这些研究显示，老年人难以抑制已经不再相关的信息；在寻找某一特定记忆时，他们常常会连同其他无关记忆一起提取出来。研究还显示，在面对认知任务时，老年人比年轻人更加依赖既有知识。

查看该段公开来源

p-9-4 原文

While the researchers focus primarily on the difficulties that these disorderly, crowded memories may pose, they also highlight a few situations in which these same memory patterns may be useful. "Evidence suggests that older adults show preserved, and at times enhanced, creativity as a function of enriched memories," the researchers write. They further hypothesize that older adults may be well served by their prior knowledge when it comes to decision-making, where they can pull on their accumulated

wisdom.

尽管研究人员主要关注这些杂乱、拥挤的记忆可能造成的困难，但他们也指出了几种相同记忆模式可能发挥作用的情形。研究人员写道：“证据表明，老年人的创造力得益于记忆内容的丰富，不仅得以保持，有时还会有所增强。”他们进一步推测，在进行决策时，老年人可能会受益于自己的既有知识，因为他们能够运用积累的智慧。

p-12-1 原文

There are at least four major problems with work in America today.

如今，美国的工作至少存在四个主要问题。

查看该段公开来源

p-12-2 原文

First, work can be alienating. Workers are often not in control of how they work, when they work, what is done with the goods and services they produce, and what is done with the profits made from their work.

首先，工作可能导致异化。劳动者往往无法掌控自己的工作方式、工作时间、对其生产的商品和服务的处置方式，以及对其劳动所创造利润的处置方式。

p-12-3 原文

Second, workers are not paid the full value of their labor. Real wages have not kept pace with productivity, driving economic inequality and a decline in labor's share of income.

其次，劳动者没有获得其劳动的全部价值。实际工资未能与生产率同步增长，导致经济不平等加剧，并使劳动收入在总收入中的占比下降。

查看该段公开来源

p-12-4 原文

Third, people are time poor. In the U.S., full time employees work an average of 8.72 hours per day despite productivity increases. Long working hours contribute to the feeling of "time poverty", which has an adverse effect on psychological well-being.

第三，人们缺乏时间。尽管生产率有所提高，美国的全职雇员每天平均工作8.72小时。长时间工作加剧了“时间贫困”感，并对心理健康产生不利影响。

Fourth, automation puts jobs and wages at risk. Technological innovation could in theory liberate people from the 40-hour work week. But unless changes are made to the structure of work, automation will simply exert downward pressure on wages and further diminish work opportunities.

第四，自动化使工作岗位和工资面临风险。从理论上说，技术创新可以使人们摆脱每周40小时的工作制。但是，除非对工作结构进行改变，否则自动化只会给工资施加下行压力，并进一步减少工作机会。

p-12-6 原文

So, what can be done to alleviate these problems? There are competing visions of the best way to arrive at a solution. One vision is what's known as the "post-work" position. The post-work theorists believe that work should not hold a central position in our lives or take up so much of our time. They assert that although doing some work might be necessary, meaning, purpose and social value reside in the communities and relationships built and sustained outside of the workplace. Thus, life should be seen as an end in itself.

那么，可以采取什么措施来缓解这些问题呢？对于如何实现解决方案，人们存在相互竞争的构想。其中一种构想被称为“后工作”立场。后工作理论家认为，工作不应在我们的生活中占据核心地位，也不应占用我们如此多的时间。他们主张，尽管从事一定的工作可能是必要的，但意义、目标和社会价值存在于工作场所以外建立并维系的社区和关系之中。因此，生活本身应被视为目的。

Questions 16 to 18 are based on the recording you have just heard.

p-16-1 原文

Recent studies show that self-control and persistence increase academic outcomes, independence of IQ. Even our personal beliefs about efforts can

affect academic outcomes. Children who think effort leads to achievementoutperform those who believe ability is a fixed trait. Given the linkbetween persistence and academic success, decisions about efforts areparticularly important in childhood.

近期研究表明，自我控制和坚持不懈能够提升学业表现，而这一作用独立于智商。甚至我们对努力的个人看法也会影响学业表现。认为努力能够带来成就的儿童，比那些认为能力是一种固定特质的儿童表现更好。鉴于坚持不懈与学业成功之间的联系，童年时期对是否付出努力的判断尤为重要。

p-16-2 原文

Yet, relatively little research has explored how young children learn what's worth the effort. We all know that infants are keen observers of the social world, but they're not just idly watching; they are tiny learning machines. They can generalize such abstract concepts as causal relationships and social roles from just a few examples. Even a 15-month-old infant can outperform a high level computer in such tasks. Could infants also make broad generalizable inferences from a few examples when it comes to effort? If so, then maybe persistence isn't simply a character trait. Maybe it's flexible and adaptable based on social context.

然而，相对而言，很少有研究探讨幼儿是如何学会判断什么值得付出努力的。我们都知道，婴儿善于观察社会世界，但他们并非只是无所事事地观看；他们是微型的学习机器。他们仅凭几个例子，就能概括出因果关系和社会角色等抽象概念。即使是15个月大的婴儿，在这类任务中的表现也可能超过高水平的计算机。当涉及努力时，婴儿是否也能根据少数几个例子作出广泛且可推广的推断？如果可以，那么坚持不懈也许并不只是某种性格特征，而是会根据社会情境灵活调整、适应变化的能力。

p-16-3 原文

To explore this question, we showed 15-month-old babies one of two things-an experimenter working hard to achieve two different goals, or an experimenter who effortlessly reached each goal. Then we introduced the baby to a novel music toy that seemed as if it could be activated by pushing a big button on top. The button could be pressed down, but didn't actually activate anything. Out of sight of the babies, we turned on the

music toy with a hidden button so that they heard the toy making music. Wegave the babies the music toy and left the room. Then analysts who didn'tknow which condition each baby was in, watched video tapes of theexperiment and counted how many times babies tried to activate the toy bypressing the button.

为了探究这一问题，我们向15个月大的婴儿展示两种情形中的一种：一名实验者努力工作以实现两个不同的目标，或者一名毫不费力地实现每个目标的实验者。随后，我们向婴儿介绍一个新颖的音乐玩具，看起来似乎可以通过按下顶部的大按钮来启动。这个按钮可以被按下，但实际上并不会启动任何功能。在婴儿看不见的地方，我们用一个隐藏按钮打开了音乐玩具，让他们听到玩具发出音乐。我们把音乐玩具交给婴儿，然后离开房间。之后，不知道每个婴儿属于哪种实验条件的分析人员观看了实验录像，并统计婴儿试图通过按下按钮启动玩具的次数。

p-16-4 原文

Across one study and a pre-registered duplication, babies who had seen an adult persist and succeed push the button about twice as many times as those who saw an adult effortlessly succeed. In other words, babies learned that effort was valuable after watching just two examples of an adult working hard and succeeding. Part of what's exciting about this finding is that the babies didn't just imitate the adult's actions. Instead, they generalized the value of effort to a novel task. The experimenter never demonstrated pushing a button or trying to make music. Instead, the babies learned from different examples of effortful actions that the new toy probably also required persistence.

在一项研究及其预注册重复实验中，看过成年人坚持不懈并取得成功的婴儿，按下按钮的次数约为看过成年人毫不费力地取得成功的婴儿的两倍。换言之，婴儿仅仅观察成年人努力工作并取得成功的两个例子后，就学会了努力是有价值的。这一发现令人兴奋的部分原因在于，婴儿并不只是模仿成年人的动作。相反，他们把努力的价值推广到了一个全新的任务中。实验者从未示范按按钮或尝试让玩具播放音乐。相反，婴儿从不同的努力行为示例中学到，这个新玩具可能也需要坚持不懈。

Set two alarms. Set one alarm that lets you know it's time to drop what you're doing and a second alarm that means you need to walk out the door. Obey the alarms. As soon as the first alarm goes off, stop what you're doing. If it's something you'll be coming back to, like a project for work, make a note to remind yourself where you left off. Grab everything you need and make sure you know how to get where you're going. Aim to be out the door and on your way before the second alarm rings. This will only work if you take the alarms seriously, so make sure you react as soon as you hear them.

Learn to leave time in between tasks and meetings. It soon becomes unbearable to shift between one meeting and another without space in between. If you overschedule yourself, however, you'll arrive late as soon as you hit a bump. As well as giving you space, this time also acts as a buffer between events, which can be borrowed from, should you be held up in a prior meeting, allowing you to still get to the next one on time. Calculate transit time between activities and then add 10 to 30 minutes for unexpected delays.

Questions 22 to 25 are based on the recording you have just heard.

p-22-1 原文

Do you think Bostonians put out the welcome mat? Do you find other cities to be more or less polite? Different cities have different feels for

visitors. Some are friendly and open; some are formal and distant. Bostontends to seem hurried and sometimes a little rude. That's what sometourists have said. One study found that people here are less willing tovolunteer to help strangers than those residents of other U.S. cities. Takea close look next time you're in Boston, and here are some of the thingsyou'll probably see: people smoking in the subway stations despite thefrequent reminders not to do so; pedestrians walking when the crosswalklights say not to do so, ignoring the cars; car drivers speeding, making aloud noise with the horn and occasionally cursing at each other. Driverswho can't be bothered to find a place to park, but instead simply turn ontheir blinker and stop in the middle of the street.

你认为波士顿人会铺上迎宾垫吗？你觉得其他城市的人更有礼貌，还是不那么有礼貌？不同的城市给游客的感觉各不相同。有些城市友好而开放，有些则拘谨而疏远。波士顿往往给人一种行色匆匆、有时还有些粗鲁的感觉。一些游客就是这么说的。一项研究发现，这里的人主动自愿帮助陌生人的意愿低于美国其他城市的居民。下次你在波士顿时，不妨仔细看看，你很可能会看到以下一些情景：尽管地铁站经常提醒人们不要吸烟，还是有人在那里吸烟；人行横道信号灯显示禁止通行时，行人仍然无视汽车继续行走；汽车司机超速行驶，大声按喇叭，偶尔还互相破口大骂。有些司机懒得找停车位，反而只是打开转向灯，把车停在马路中央。

p-22-2 原文

Sometimes Bostonians seem like they're just too busy to be polite. Why is their city like that? Former U.S. representative Chester Atkins says it's because the Puritan founding fathers were themselves impatient and bad-tempered, and had little time for courtesy. That culture has carried down to the present day, he believes. Boston College professor Thomas O'Connor thinks a contributing factor is Boston's history as a city where each new group of immigrants was treated with suspicion and exclusion. That's given Boston a sense of clannishness and reserve, he thinks. The idea of a stranger greeting another stranger is simply not part of the local culture, he says. People will begin a conversation with someone they know, but not with a stranger. Ralph Whitehead, a professor of journalism at the University of Massachusetts at Amherst, thinks it's because Boston's upper class used manners to make class distinctions. By being snobbish about manners, Proper Bostonians made other people scornful of courtesy, he

says.

有时波士顿人给人的感觉是，他们只是太忙了，顾不上讲礼貌。他们的城市为什么会这样？美国前众议员切斯特·阿特金斯说，这是因为那些清教徒开拓者本身就缺乏耐心、脾气暴躁，没有多少时间讲究礼节。他认为，这种文化一直延续到了今天。波士顿学院教授托马斯·奥康纳认为，另一个促成因素是波士顿的历史：每一批新来的移民都曾受到猜疑和排斥。他认为，这使波士顿形成了一种排外和矜持的气质。他说，陌生人主动向另一个陌生人打招呼，根本不属于当地文化的一部分。人们会与自己认识的人开始交谈，却不会与陌生人交谈。马萨诸塞大学阿默斯特分校新闻学教授拉尔夫·怀特黑德认为，这是因为波士顿上流社会曾利用礼仪来划分阶层。他说，波士顿那些讲究“正统礼仪”的人对礼仪表现得势利，从而使其他人开始鄙视礼节。

Some say that’s just the way Boston is and that the city will never change. Still, other cities with reputations for worse rudeness are trying hard to change their images. Paris is one example where people are trying to be friendly. New York City is another. There, the city is trying to persuade subway riders to be more considerate. If those cities can make the effort, maybe Boston should as well.

有人说，波士顿就是这样，这座城市永远不会改变。不过，一些因粗鲁而声名更差的城市正在努力改变自己的形象。巴黎就是一个例子，那里的人们正在努力变得友好。纽约市是另一个例子。在那里，市政府正试图劝说地铁乘客更加体谅他人。如果那些城市都能付出努力，波士顿或许也应该这样做。

W: Over the summer, I traveled through rural mountain villages throughout Asia in search of handicrafts to decorate my new studio with. The embroidery done by the women in a particular village was so exquisite. I couldn't stop thinking about it. Trying to recreate their designs would have been futile. So instead, I applied my own eccentric approach. Using glitter, I drew similar intricate patterns onto the velvet cape. This ended up in the glamorous, luminous look that concluded the show.

Questions 9 to 11 are based on the passage you have just heard.

p-9-1 原文

Pet dogs can often readily understand a wide range of their owners' commands and gestures, but are these abilities inborn or are they exclusively learned through training? To find out, a new study examined whether stray dogs could understand human gestures. The study revealed that 80% of participating dogs successfully followed pointing gestures to a specific location despite having never received prior training. The results suggest that dogs can understand complex gestures by simply watching humans. This could have implications in reducing conflict between stray dogs and humans.

Dogs were domesticated 10,000 to 15,000 years ago. This means they are probably the oldest domesticated animals on the planet. Humans then bred dogs with the most desirable and useful traits so that they could function as companions and workers. This resulted in domesticated dogs that are highly responsive to human commands and gestures. However, it was not clear whether dogs understand us through training alone, or whether this was an inherent ability. Why does this matter?

狗在一万至一万五千年前被驯化。这意味着它们很可能是地球上最早被驯化的动物。后来，人类将具有最理想、最有用特征的狗进行繁育，使它们能够充当伴侣和工作动物。由此形成的家犬对人类的命令和手势反应非常灵敏。然而，人们并不清楚，狗是否仅仅通过训练来理解我们，还是说这是一种与生俱来的能力。这为什么重要呢？

Stray dogs are a common feature in cities around the world. They may observe and occasionally interact with people, but such dogs have never been trained, and are behaviorally "wild". Conflicts between stray dogs and humans are a problem. Understanding how humans shape stray dogs' behavior may help alleviate this problem. According to the researchers of the new study, stray dogs are intelligent creatures. They closely observe humans and use their understanding of us to make a decision. Treating stray dogs with sensitivity and respect, and giving them space, the researchers assert, can reduce much conflict.

Because of this, food product placement within the appliance is far more important than you probably realize.

The whole purpose of the modern refrigerator is to slow the growth of bacteria, which thrive in temperatures from 4.4 to 60 degrees Celsius. As a result, refrigerators are typically set at or below that low end to protect foods against bacteria. Although it might seem like time spent organizing the fridge will spoil your day, doing so will actually make it more user-friendly, easier to clean and food safety-conscious.

Those little bins on the inside of refrigerator doors are convenient, but they don't maintain a consistent temperature, so definitely refrain from putting perishable foods in there. The top area is not as cold as the bottom of the fridge, so save it for the foods that don't need extra-chilly temperatures. Store foods that are ready to eat or already cooked on the

top shelf. The middle shelf is the most temperature-controlled part of thefridge, so place eggs here. Drinks and prepared foods can also live on themiddle shelf if you ran out of room up top. The back of the bottom shelf isthe coldest spot in the fridge, so store perishable dairy products here tokeep them edible longer. Never store foods with high water content here,because the water within them can and will freeze, effectively ruining them.

冰箱门内侧的那些小格子虽然很方便，但无法保持恒定的温度，所以一定不要把易腐食品放在那里。冰箱顶部区域没有底部那么冷，因此应留给那些不需要特别低温的食物。把即食食品或已经烹调好的食物放在顶层搁板上。如果顶部没有空间，也可以把饮料和熟食放在中层搁板上。中层搁板是冰箱内温度控制最稳定的区域，因此应把鸡蛋放在这里。底层搁板靠后的部位是冰箱内最冷的地方，所以应把易腐乳制品存放在这里，以便延长其可食用时间。切勿在这里存放含水量高的食物，因为其中的水分会结冰，从而彻底毁掉这些食物。

In one project we are looking at hip fracture in older people, which is a common event and we're trying to understand the impact of depression. Often people in hospital with a hip fracture develop depression, and these are the people that then go on to become feeble a lot more quickly than others. They get infections. Often these infections lead to death. So we're trying to slow down that progression to feebleness. So if we can better understand how these factors interact, then we can actually start doing something about it.

The impact that my research will have in Birmingham, first of all, is obviously for older people because these are the people that are having hip fractures and developing depression, and we're trying to improve their health and their quality of life. But this isn't just a problem in Birmingham or even in the UK. This is a problem globally. People are aging. There's a lot more people in the older generation who are living for longer but not necessarily staying healthy for a large part of their lives. So the last part of their life can often be full of ill health, and we're trying to understand factors that can contribute to the quality of life later on.

首先，我的研究在伯明翰产生的影响显然会惠及老年人，因为髋部骨折并患上抑郁症的正是这些人，而我们正努力改善他们的健康状况和生活质量。但这不仅是伯明翰，甚至也不仅是英国面临的问题，而是一个全球性问题。人们正在变老。老年群体中有越来越多的人寿命延长了，但他们未必能在生命的大部分时间里保持健康。因此，他们生命的最后阶段往往充满疾病，而我们正试图了解那些可能影响晚年生活质量的因素。

I think the thing that excites me most about my research is that it feels real and relevant. Lots of academics are probably very excited about their research, but it might not be that relevant to those around them. Whereas I feel that the work I do is relevant to everyone because everyone is aging. Health is an issue for everyone, regardless of their age, and what I'm trying to do is understand the factors that affect health and how we can improve the quality of life in people. So that's one of the things that really excites me about it. One of the other things is, rather than just taking one perspective, so rather than looking at aging and health just from the perspective of the psychologist, we are now bringing together a lot of different techniques and a lot of different viewpoints to actually

look at the sort of different factors affecting health.

我认为，研究中最让我感到兴奋的是，它真实而且与现实密切相关。许多学者可能都对自己的研究非常兴奋，但这些研究未必与身边的人有那么大的关联。而我觉得，我所做的工作与每个人都相关，因为每个人都会变老。无论年龄大小，健康都是每个人都要面对的问题，而我努力做的，就是了解影响健康的因素，以及我们如何改善人们的生活质量。这是让我真正感到兴奋的事情之一。另一个原因是，我们不只是采取单一视角，也就是说，不只是从心理学家的角度来看待衰老和健康，而是将许多不同的技术和观点结合起来，实际研究影响健康的各种不同因素。

According to market data enterprises, Americans spend nearly 10 billion dollars a year on self-help and personal-organization products. The market is huge, partly because most colleges and graduate schools don't teach basic organization, but cooking schools and professional kitchens do.

根据市场数据公司的资料，美国人每年在自我提升和个人组织管理产品上的花费接近100亿美元。这个市场规模巨大，部分原因在于大多数高校和研究生院并不教授基本的组织管理方法，而烹饪学校和专业厨房却会教授这些内容。

p-19-3 原文

Perhaps the principles of cooking organization can be extended to help even those of us who aren't top chefs. The system that makes kitchens function is called "mise-en-place", or literally "put in place". It's a French phrase that means to gather and arrange the ingredients and tools needed

for cooking.

也许，烹饪中的组织原则可以推广开来，甚至帮助我们这些并非顶级厨师的人。使厨房运转起来的这套系统叫作“mise-en-place”，字面意思是“放置到位”。这是一个法语短语，意为收集并安排好烹饪所需的食材和工具。

查看该段公开来源

p-19-4 原文

But for many professional cooks, the phrase means something deeper. Some cooks call it their religion. It helps them coordinate vast amounts of labor and material, and transforms the lives of its practitioners through focus and self-discipline. Students at the culinary institute of America view it as a way of life. It's a way of concentrating their mind to only focus on the aspects that they need to be working on at the moment, to kind of rid themselves of distractions. And it's a habit that some students carry with them even when they're not in the kitchen. They mise-en-place their life. They set up their books for class. They set up their chef whites. They shine their shoes. They know everything that they need every step of the day.

但对许多专业厨师来说，这个短语有着更深层的含义。有些厨师称之为自己的宗教。它帮助他们协调大量的人力和物资，并通过专注和自律改变实践者的生活。美国烹饪学院的学生把它视为一种生活方式。这是一种集中精神的方法，让他们只专注于当下需要处理的事情，从而摆脱各种干扰。有些学生即使不在厨房里，也会保持这一习惯。他们按这种方式安排自己的生活。他们为上课准备好书本，整理好厨师服，擦亮鞋子。他们知道一天中的每一步需要用到的一切。

查看该段公开来源

p-19-5 原文

Then how does one attain this level of organization? The key to high-level organization is the mindset. Cooks can easily do six hours of preparation for a three-hour dinner shift. "Mise-en-place forces cooks to account for every minute of their time and every movement. Every component of one single dish is in one single corner, so their hand literally moves inches," explains Dwayne Lipuma, an instructor at the culinary institute of America. "Once students set up their station, I should be able to cover up their eyes. And they should know that their knives are always here, their oil is

always right here, their salt and pepper is always right here."

那么，一个人如何才能达到这种程度的组织性呢？高水平组织的关键在于思维方式。厨师们很容易为三个小时的晚餐班次准备六个小时。“mise-en-place迫使厨师计算出时间的每一分钟和动作的每一次移动。一道菜的每一个组成部分都放在同一个角落里，因此他们的手实际上只需移动几英寸。”美国烹饪学院的讲师德韦恩·利普玛解释道，“学生们一旦布置好自己的工作台，我就算蒙住他们的眼睛，他们也应该知道刀具总是在这里，油总是在这里，盐和胡椒总是在这里。”

But practiced at its highest level, mise-en-place says that time is precious, resources are precious, space is precious, your self-respect and the respect of others are precious. Use them wisely. Isn't that a philosophy for our time?

但当mise-en-place得到最高程度的实践时，它所传达的是：时间很宝贵，资源很宝贵，空间很宝贵，你的自尊以及他人的尊重都很宝贵。要明智地使用它们。这难道不正是适合我们这个时代的一种人生哲学吗？

Questions 22 to 25 are based on the recording you have just heard.

p-22-1 原文

Why do we stop making goals for ourselves and stop progressing in life? One reason is the belief that we should accept who we are and not constantly strive to improve ourselves. The mistake we make with this is that whilst self-acceptance is imperative, it should actually be used as the basis for growth. When we're not growing, learning and seeking improvements in our lives, we tend to stagnate, accepting what is, and stop believing we can be better.

为什么我们会停止为自己设定目标，停止在人生中不断进步？其中一个原因，是我们认为应该接受真实的自我，而不是不断努力提升自己。我们在这件事上犯的错误是：尽管自我接纳至关重要，但它实际上应当成为成长的基础。当我们不再成长、学习，也不再寻求改善生活时，往往就会停滞不前，接受现状，并不再相信自己能够变得更好。

p-22-2 原文

A key tool for creating goals and progressing, is using our imagination. Yet as is so often the case, by the time we've reached midlife, we've stopped dreaming about what we want to achieve and feel quite negatively about goal setting. Instead of feeling confidence, happiness and satisfaction from achieving our goals, we feel we are always falling short. That leads to disappointment, and we stop dreaming. We stop imagining the life we'd like to have or the person we'd like to be, quickly finding ourselves shattered by the pain of our reality.

创造目标并取得进步的一个重要工具，是运用我们的想象力。然而，正如经常发生的那样，到了中年，我们已经不再憧憬自己想要实现的事情，并且对设定目标抱有相当消极的态度。实现目标本应带来自信、幸福感和满足感，但我们感受到的却总是自己未能达到要求。这会导致失望，于是我们不再憧憬，也不再想象自己想要拥有的生活或想成为的人，很快便会因现实的痛苦而感到心碎。

Up until now, unless we work in the creative industry, we've found the idea of using "play" a bit childish. In the West, we're mostly operating from our heads, the rational mind. But it's beginning to be better understood, because using our imagination is actually one of the most powerful things we could ever do.

到目前为止，除非我们从事创意行业，否则我们一直觉得运用“玩耍”这个概念有些幼稚。在西方，我们大多依赖头脑，也就是理性思维来行动。但人们开始更好地理解这一点，因为运用想象力实际上是我们所能做的最强大、最有力量的事情之一。

p-22-4 原文

The problem with finding ourselves irritated for not achieving the goal is because the goal always changes and we're always adapting, whether we realize it or not. What happens, therefore, is that we end up feeling like we're never going to reach our goals. And herein lies one of the biggest misconceptions and reasons for failure, dissatisfaction and unhappiness. We measure against the goal, rather than where we've come from. Dan Sullivan calls this "the gap and the gain". We measure always against the goal,

which we never feel we're reaching, rather than the gain, that is wherewe've come from. In measuring where we've come from, rather than wherewe're trying to get to, we see results. We see things we've taken forgranted, or not noticed. It's a simple, yet profound change in perception,and what I love about it is the power it has to instantly shift us up agear. It's so, so simple, yet has an immediate, positive impact on ourthinking.

之所以会因未能实现目标而感到恼怒，问题在于目标总是在变化，而我们也始终在不断调整自己，无论是否意识到这一点。因此，最终我们会觉得自己永远不可能实现目标。这正是人们对失败、不满和不幸福最大的误解和原因之一。我们总是拿自己与目标进行比较，而不是与过去的自己比较。Dan Sullivan 将此称为“差距与收获”。我们总是以目标为参照进行衡量，而我们从未觉得自己正在接近目标；我们没有衡量收获，也就是自己从何处走来。衡量自己从何处走来，而不是试图走向何方时，我们就能看到成果。我们会看到那些曾经视为理所当然或未曾注意到的事情。这是观念上的一个简单却深刻的改变，而我喜欢它的地方在于，它所拥有的力量能够让我们立刻提升一个层次。它非常非常简单，却能立即对我们的思维产生积极影响。

Questions 9 to 11 are based on the passage you have just heard.

p-9-1 原文

One thing I've learned in a quarter-century of management is that there are ample gray areas in human behavior, and that there may not always be clear right-or-wrong solutions to employee disputes. When two people have different versions of the same event, it can be hard to know whom to

believe. One such circumstance always comes back to me. It happened yearsago, and it's a measure of the forgettable nature of the conflict that I nolonger even recall what the dispute was about, but I definitely recall theresolution. Two talented young executives, one of whom I was managing, hadvastly different accounts of the same event, and it seemed likely we'dnever get to the truth. We reached the deadlock, and the manager of theother individual said, "Here's something I learned from an excellentmanager I once worked for. He used to say, 'When in doubt, assume positiveintent.'" And just like that, we had a path forward. My counterpart and Iagreed we might never ascertain the actual facts of the matter; quitelikely there were elements of truth in both employees' stories. We agreedto monitor their actions and relationship going forward, but to interveneno further. We assumed the best about both of them and moved on. The resultwas that we were able to put the conflict behind us. In fact, theirproblems didn't recur. Over the years, this general approach has proveduseful. Whenever the truth is obscure, assuming positive intent andagreeing to move on can be a constructive decision.

我在四分之一世纪的管理工作中学到的一点是，人类行为中存在大量灰色地带，对于员工之间的纠纷，未必总能找到明确的是非对错解决方案。当两个人对同一事件有不同说法时，很难知道该相信谁。有一种类似情况我始终记得。事情发生在多年前，而这场冲突本身容易被遗忘，以至于我如今甚至想不起争议究竟是关于什么的，但我清楚地记得最后是如何解决的。两位才华横溢的年轻高管，其中一位由我负责管理，对同一事件的叙述大相径庭，我们似乎很可能永远无法查明真相。我们陷入了僵局，另一位员工的经理说："我曾经跟随一位出色的经理工作，从他那里学到了一件事。他过去常说：'当你无法确定时，就假定对方的动机是善意的。'"就这样，我们找到了前进的方向。我和那位同事一致认为，我们也许永远无法查明事情的实际情况；很可能两位员工的说法中都包含部分事实。我们同意继续观察他们今后的行为和关系，但不再进一步介入。我们对他们两人都作最好的设想，然后继续向前。结果是，我们得以把这场冲突抛在身后。事实上，他们的问题再也没有发生。多年来，这种总体处理方式一直很有用。每当真相模糊不清时，假定对方的动机是善意的，并同意继续向前，可能是一项具有建设性的决定。

Questions 12 to 15 are based on the passage you have just heard.

p-12-1 原文

For some Americans, going out to dinner is a treat, planned and budgeted for. For others, it's just a daily occurrence. And that second group of people is becoming the majority as the number of Americans who enjoy cooking is declining. In the early 2000s, researcher Eddie Yoon conducted a survey to ascertain Americans' attitudes to cooking. The survey found that 15% of Americans loved to cook, 50% said they hated to cook and 35% reported mixed feelings. When Yoon conducted the same survey 15 years later, only 10% of respondents reported a love of cooking, 45% said they hated it and 45% had mixed feelings. Yoon asserts cooking is akin to sewing. As recently as the early 20th century, many Americans sewed their own clothing. Today, the vast majority of Americans buy clothing; only a tiny minority still sew, and they do it mainly as a hobby. Yoon believes the number of home cooks will diminish in a similar fashion. Currently, the average American household spends over $3,000 per year on dining out. However, what people save in convenience, they lose in cash. Take buying lunch on workdays for example. People spend, on average, $10 per meal when they buy lunch. Making your own lunch, meanwhile, will cost less. One survey found people only spend on average $6.30 when they bring lunch prepared at home. Americans' growing aversion to spending time in the kitchen signifies a host of challenges for the grocery industry. It's likely to detrimentally impact family finances as well.

对一些美国人来说，外出就餐是一种经过计划并纳入预算的享受。对另一些人来说，这只是每天都会发生的事情。随着喜欢烹饪的美国人数量不断减少，第二类人正在成为多数。21世纪初，研究人员埃迪·尹开展了一项调查，以了解美国人对烹饪的态度。调查发现，15%的美国人喜欢烹饪，50%的人表示讨厌烹饪，35%的人表示感受复杂。15年后，尹再次进行同样的调查，只有10%的受访者表示喜欢烹饪，45%的人表示讨厌烹饪，另有45%的人感受复杂。尹认为，烹饪类似于缝纫。就在20世纪初，许多美国人还会自己缝制衣服。如今，绝大多数美国人购买衣服，仍然缝纫的只是极少数人，而且他们主要是把缝纫当作一种爱好。尹认为，家庭厨师的数量也会以类似的方式减少。目前，美国普通家庭每年在外出就餐上的花费超过3,000美元。然而，人们在便利性上节省下来的，却会在现金支出上付出代价。以工作日购买午餐为例，人们购买午餐时平均每顿要花10美元。与此同时，自己准备午餐的成本会更低。一项调查发现，人们自带在家准备的午餐时，平均每顿只花费6.30美元。美国人日益不愿意花时间待在厨房里，这对食品杂货行业意味着一系列挑战。这种趋势也很可能会对家庭财务造成不利影响。

Questions 16 to 18 are based on the recording you have just heard.

p-16-1 原文

Every year, of the more than 2.5 billion bags checked onto flights worldwide, 26 million go missing - and of that 26 million, 1 million never make it back to their original owner. Bad weather and flight delays, miscoded destination tags and some people simply forgetting to pick up one of their bags are a few of the reasons. But the number-one reason a bag ends up lost is that it has no ID tag, and airlines don't know to whom it belongs.

每年，在全球航班上办理托运的超过25亿件行李中，有2600万件会丢失；而在这2600万件中，有100万件永远无法回到原主人的手中。恶劣天气和航班延误、目的地标签编码错误，以及有人单纯忘记取走自己的某件行李，都是造成这种情况的部分原因。但行李最终丢失的首要原因是没有身份标签，航空公司不知道它属于谁。

p-16-2 原文

Transferring baggage from check-in to departure gates to arrival gates to baggage claim is a delicate piece of timing. If the system moves too slowly, the bags won't make connecting flights. If it's too fast, the bags may make the connection but the passengers might miss the flight. Each airport has its own way of allotting how much time a bag needs to move in transit. Some airports have sophisticated automated systems, including scanners that read baggage labels, destination-coded vehicles that load and unload the bags without stopping, and sorting machines that route baggage to the appropriate gate. Even so, all that technology may not save your baggage tag from being torn off on the conveyor belt, making you the owner of a bag with no name.

将行李从值机柜台转运到出发登机口，再转运到到达登机口，最后送至行李提取处，需要精确掌握时间。如果整个系统运行得太慢，行李就赶不上联程航班；如果运行得太快，行李可能赶上了联程航班，但乘客却可能误机。每座机场都有自己的方式来分配行李在转运过程中所需的时间。有些机场拥有先进的自动化系统，包括能够读取行李标签的扫描仪、无需停下就能装卸行李的目的地编码车辆，以及将行李分拣至相应登机口的分拣机。即便如此，所有这些技术也未必能防止你的行李标签在传送带上被撕掉，使你成为一件无名行李的主人。

p-16-3 原文

Once a bag goes missing and the passenger files a claim, the bag is declared "mishandled" by the carrier. Mishandled refers to bags that have been delayed, lost, stolen or damaged. Most delayed bags are only one flight behind their owners and can be delivered within 24 hours. The other bags are examined by airline employees for clues to their ownership and destination. If the mystery is solved, those bags are returned to their owners within four or five days. Bags with no destination code or identification tag are shipped to a central warehouse, and undergo a comprehensive baggage tracing process over the next 90 days.

行李一旦丢失，乘客提交索赔后，承运方就会将其认定为“处置不当”。“处置不当”是指行李延误、丢失、被盗或受损。大多数延误的行李只比主人晚一个航班，能够在24小时内送达。其他行李则由航空公司员工检查，以寻找有关其所有者和目的地的线索。如果谜团得以解开，这些行李会在四五天内归还给主人。没有目的地编码或身份标签的行李会被运往一个中央仓库，并在接下来的90天内接受全面的行李追踪调查。

Airlines inventory their mishandled baggage, and many use a database to match the contents with owners' descriptions. It takes about three months to go from "missing in action" to "irretrievably lost". Once that happens, the bags are donated to charity, sold at auction, or purchased by a company which sells them to the public.

航空公司会对处置不当的行李进行登记，许多航空公司还会使用数据库，将行李内容与所有者的描述进行匹配。从“失联”到“无法追回的遗失”，大约需要三个月。一旦被认定为无法追回，这些行李就会捐给慈善机构、被拍卖，或由一家将其出售给公众的公司买走。

Questions 19 to 21 are based on the recording you have just heard.

p-19-1 原文

You've probably been with someone who ignored you while interacting with his or her smartphone. And you've probably engaged in this behavior yourself. In a recent survey, nine out of ten respondents said they'd used their smartphone during their most recent social activity. There's also evidence that this behavior is socially harmful. It can leave people less satisfied with their face-to-face interactions. And it can generate feelings of resentment and jealousy. Now, the Journal of Applied Social Psychology has published a new study exploring the reasons for these effects.

你可能曾和这样的人在一起：他或她在与你互动时却忽视你，只顾摆弄智能手机。你自己可能也有过这种行为。最近的一项调查显示，十名受访者中有九人表示，他们在最近一次社交活动中使用过智能手机。也有证据表明，这种行为会损害社交关系。它可能使人们对面对面的互动感到不那么满意，还可能引发怨恨和嫉妒情绪。如今，《应用社会心理学杂志》发表了一项新研究，探讨了这些影响产生的原因。

In one version of the experiment, the phone of the participants' conversation partner remained unused on the table throughout the conversation. In another version, their partner's attention was quickly drawn to something on their phone and they spent the rest of the time interacting with their phone. A third version involved the participants' partner alternating between periods of interaction with their phone and periods where they ignored their phone. If you've experienced a similar situation, you probably won't be surprised by the results of the experiments.

The researchers believed that focusing on one's phone instead of the person one is with has this effect because it's seen as a form of social exclusion. They assert that the behavior is analogous to when people have no choice but to eat alone in the school cafeteria. The twist is that this exclusion occurs while sharing a physical encounter and having a conversation. Researchers found that the behavior had adverse effects on participants' sense of belonging, need for meaning and self-esteem.

研究人员认为，把注意力放在手机上而不是身边的人身上之所以会产生这种影响，是因为这种行为被视为一种社会排斥形式。他们断言，这种行为类似于人们别无选择、只能独自在学校食堂吃饭的情形。不同之处在于，这种排斥发生在双方共享同一场面对面接

Questions 22 to 25 are based on the recording you have just heard.

p-22-1 原文

More and more people travel for a variety of reasons. Many are tourists, but many venture forth on personal or professional business. Whatever the reason for traveling, a common complaint of travelers is the impersonal accommodations they find. After spending five consecutive nights in five similar hotels, the business traveler may find it difficult to remember what happened from day to day, or even what towns were visited, and the tourist may get the mistaken impression that all cities are pretty much the same, at least as far as decoration, food and service are concerned.

越来越多的人出于各种原因旅行。许多人是游客，但也有许多人因个人事务或公务外出。不论出于何种旅行原因，旅行者普遍抱怨的一点是，他们所住的住宿场所缺乏个性。商务旅行者连续五晚住在五家相似的酒店后，可能会难以记清每天发生了什么，甚至记不住去过哪些城镇；而游客则可能产生一种错误印象，认为所有城市都大同小异，至少在装潢、食物和服务方面是如此。

查看该段公开来源

p-22-2 原文

To combat this sense of impersonal sameness, travelers are taking advantage of in-home hospitality or Bed and Breakfast arrangements. B&Bs, I mean, Bed and Breakfast arrangements are private homes which offer lodging and breakfast in a very personalized, friendly setting. For decades, B&Bs have been the classic way to visit Europe, especially the British Isles. And in fact, they are not really a new idea in America. The tradition dates back to colonial times when inns were few and far between, and the weary traveler had to depend on the kindness of strangers for a meal and a bed. But the revival of B&Bs as desirable accommodations is a fairly recent phenomenon.

为了消除这种千篇一律、缺乏个性的感受，旅行者开始利用家庭式接待或提供住宿加早餐的安排。我所说的B&B，就是住宿加早餐安排，指的是私人住宅在十分个性化且友好的环境中提供住宿和早餐。几十年来，B&B一直是游览欧洲，尤其是英伦群岛的经典方式。事实上，这在美国也并不是什么新鲜事。这一传统可以追溯到殖民时期，那时旅店十分稀少，疲惫的旅行者不得不依靠陌生人的善意来获得一顿饭和一张床。不过，B&B作为理想住宿方式的复兴，是相当近期的现象。

查看该段公开来源

p-22-3 原文

If the idea of operating a B&B arouses your interest, there are several factors to consider before plunging into this business. The first consideration is your property, not only the building itself, but the location. If you live near a famous historical site or in a popular destination, such as New York City or Washington, D.C., your home can be fairly simple, yet still do well as a B&B. On the other hand, if your home is architecturally unique or has facilities for the traveler, such as a private entrance, private bath or swimming pool, people may be willing to go some distance to reach you. Another important factor is the lifestyle of you and your family. You must take into account whether all members of the family truly enjoy visitors, want to repeatedly discuss local sites and activities, and have the time and energy to handle the additional cooking, cleaning, laundry and the bookkeeping involved. The final consideration is a financial one, potential B&B hosts must be realistic about opportunities for income. While B&Bs usually have low initial costs, experts estimate it would take at least five rooms rented regularly for the host to earn a living from B&B.

如果经营B&B的想法引起了你的兴趣，那么在贸然投入这项业务之前，有几个因素需要考虑。首先要考虑的是你的房产，不仅包括建筑物本身，还包括其位置。如果你住在著名历史遗址附近，或住在纽约市、华盛顿特区等热门目的地，你的房子即使相当普通，也仍然可以很好地经营成B&B。另一方面，如果你的房屋在建筑风格上独具特色，或拥有方便旅行者使用的设施，例如私人入口、私人浴室或游泳池，人们可能愿意走相当远的路来投宿。另一个重要因素是你和家人的生活方式。你必须考虑家庭的每一位成员是否真的喜欢接待客人，是否愿意反复谈论当地的景点和活动，以及是否有时间和精力承担由此增加的烹饪、清洁、洗衣和记账工作。最后还要考虑财务因素。潜在的B&B经营者必须现实地看待收入机会。虽然B&B通常前期成本较低，但专家估计，经营者至少需要定期出租五间客房，才能靠B&B维持生计。

Questions 9 to 11 are based on the passage you have just heard.

p-9-1 原文

Many restaurants are trying to persuade customers to eat more sustainably, moving away from environmentally unfriendly meat towards greener dishes. Although it sounds counter-intuitive, restaurants which include specific vegetarian sections on their menus may be unintentionally encouraging customers to eat meat, a new study suggests.

许多餐厅正试图劝说顾客以更可持续的方式饮食，从对环境不友好的肉类转向更环保的菜肴。一项新研究表明，尽管这听起来有悖直觉，但菜单上设有专门素食菜品区的餐厅可能会在无意中鼓励顾客食用肉类。

p-9-2 原文

Behavioral scientist Linda Bacon, one of the study's authors, said, "Restaurants can have a positive impact on the environment by encouraging their customers to choose more plant-based food and less meat. However, our findings suggest that while certain restaurant menu designs can encourage some consumers to make pro-environmental food choices, they can have the opposite effect on others." The study involved 750 people, half of whom frequently ate vegetarian food and half of whom rarely ate it. No vegetarians were included. They were given different menus and asked to choose a meal as if they were eating out with friends. Placing vegetarian dishes in a separate section did not have a significant effect on the choices made by infrequent vegetarian food eaters. But it did have a notable effect on the frequent eaters, lowering their chance of picking a vegetarian option by 65%. The researchers also discovered that presenting a vegetarian dish as the chef's recommendation, or including a more appealing description of a non-meat meal, leads to a greater proportion of infrequent vegetarian eaters choosing a vegetarian option. But again, these altered menu designs backfired with those who ate vegetarian food more frequently, leading them to be less likely to choose a vegetarian dish.

行为科学家琳达·培根是该研究的作者之一，她说："餐厅可以通过鼓励顾客选择更多植物性食物、少吃肉类，对环境产生积极影响。然而，我们的研究结果表明，某些餐厅

菜单设计虽然能促使一些消费者作出有利于环境的食物选择，却可能对另一些消费者产生相反的效果。”这项研究涉及750人，其中一半经常吃素食，另一半很少吃素食。参与者中没有素食者。他们拿到不同的菜单，并被要求像和朋友外出就餐一样选择一顿饭。将素食菜品放在单独的栏目中，对很少吃素食者的选择没有显著影响。但这一做法对经常吃素食者产生了明显影响，使他们选择素食菜品的可能性降低了65%。研究人员还发现，将一道素食菜品列为主厨推荐，或为一道非肉类餐食附上更具吸引力的描述，会使选择素食菜品的不常吃素食者比例更高。但同样，这些经过调整的菜单设计对经常吃素食者适得其反，使他们更不可能选择素食菜品。

Questions 12 to 15 are based on the passage you have just heard.

Nottingham Trent University and the Chinese Academy of Sciences have been trying to find a way to prevent deadly outdoor air pollution from penetrating indoors. They found that if pollution is frozen to around -18 °C in a condensing tube, the particles gather together and fall to the bottom, allowing fresh, clean air to pass through. Their method was able to remove 99% of pollutants. It is hoped that the work could pave the way for simple modification of air conditioning units so that they can also clean polluted indoor air.

Outdoor air pollution in cities is a global problem, whether it be haze plaguing Calcutta or poor air impacting the health of children in London schools. While there are some existing technologies to purify indoor air, they can be inefficient, expensive or produce harmful by-products. When outdoor air quality is poor, people tend to spend even more time indoors. But outdoor pollution also leads to indoor pollution, and people still suffer. It is estimated that pollution is linked to over 40,000 early deaths in Britain each year. Professor Gang Pan of the Chinese Academy of

Sciences said, "We have shown in our experiments that simply by circulatingpolluted air through a small freezing chamber, we can remove most of thefine particles and gas pollutants. Our study makes it possible to add anair cleaner option to household appliances in areas which might experienceextremely poor air conditions. By controlling indoor air pollution andimproving air quality in this way, this work could be greatly beneficial topublic health."

城市室外空气污染是一个全球性问题，无论是困扰加尔各答的雾霾，还是影响伦敦学校儿童健康的恶劣空气，都是如此。虽然目前已有一些净化室内空气的技术，但它们可能效率低下、成本高昂，或产生有害副产品。当室外空气质量较差时，人们往往会在室内待更长时间。但室外污染也会导致室内污染，人们仍然会受到影响。据估计，在英国，污染每年与4万多例过早死亡有关。中国科学院的潘刚教授说：“我们的实验表明，只需让受污染的空气循环通过一个小型冷冻室，就能去除大部分细颗粒物和气态污染物。我们的研究使得在可能经历极差空气状况的地区，为家用电器增加空气净化功能成为可能。通过以这种方式控制室内空气污染并改善空气质量，这项工作将大大有益于公众健康。”

This is a test that demonstrates self-recognition in animals. Only a few animals, such as humans, apes, dolphins and some birds, can recognize themselves in a mirror. And only these animals, capable of self-recognition, will attempt to remove marks placed on their skin after noticing them in the reflection. This ability suggests a level of higher intelligence and awareness. This is not shown by children until around 18

months. Until now, no fish has demonstrated the ability. But ourexperiments show the fish in question will scrape up against hard surfacesto remove marks placed on its body by our researchers after viewing itselfin a mirror. The behaviors we observe leave little doubt that this fishbehaviorally fulfills all criteria of the mirror test as originally laidout. The fish in our study never attempted to remove the marks when nomirror was present or when the marks were just placed on the mirror.Unmarked fish also did not attempt to remove marks from themselves wheninteracting with a marked fish on the other side of a window. These resultsshow either that fish are self-aware or that the mirror test, which isconsidered to be the gold standard test used to denote higher intelligence,may be flawed.

这是一项用来证明动物具有自我识别能力的测试。只有少数动物，例如人类、猿类、海豚和一些鸟类，能够在镜子中认出自己。也只有这些具有自我识别能力的动物，才会在倒影中注意到皮肤上的标记后，试图将其去除。这种能力表明动物具有较高程度的智力和意识。儿童要到大约18个月大时才会表现出这种能力。到目前为止，还没有鱼类展示过这种能力。但我们的实验表明，这种鱼在镜子中看到自己后，会在坚硬的表面上摩擦身体，以去除研究人员放在它身上的标记。我们观察到的行为几乎毫无疑问地表明，这种鱼在行为上满足了镜子测试最初设定的全部标准。我们的研究中的鱼在没有镜子时，或标记只是被放在镜子上时，从未试图去除这些标记。未被标记的鱼在隔着窗户与另一侧的被标记鱼互动时，也没有试图去除自己身上的标记。这些结果表明，要么鱼类具有自我意识，要么被视为判定较高智力的黄金标准测试的镜子测试存在缺陷。

What is less clear is whether these behaviors should be considered as evidence that fish are self-aware, even though in the past these same behaviors have been interpreted as self-awareness in so many other animals. Depending on your position, you might reject the interpretation that these behaviors in a fish satisfy passing the test at all. But on what objective basis can you do this when the behaviors they show are so functionally similar to those of other species that have passed the test?

不太明确的是，尽管过去人们一直将其他许多动物的这些相同行为解释为自我意识的表现，但这些行为是否应被视为鱼类具有自我意识的证据。根据你的立场，你可能完全拒绝接受这样的解释，即鱼类的这些行为足以满足通过该测试的条件。但是，当鱼类表现

出的行为在功能上与其他通过测试的物种如此相似时，你又能以什么客观依据这样做呢？

Results from our research raise more questions than answers. What if self-awareness develops like an onion, building layer upon layer rather than appearing all at once? Perhaps in order to explore self-awareness further, we should stop looking at responses to the mirror as a decisive test. Only with a richer theory of the self and a larger test battery will we be able to determine all of the various levels of self-awareness, including where exactly fish fit in.

我们的研究结果提出的问题多于给出的答案。如果自我意识像洋葱一样逐层发展，而不是一下子全部出现，会怎么样？也许，为了进一步探究自我意识，我们应该不再把对镜子的反应视为决定性测试。只有建立起更丰富的自我理论，并采用规模更大的测试组合，我们才能确定自我意识的各种不同层次，包括鱼类究竟处于其中的哪个位置。

Questions 19 to 21 are based on the recording you have just heard.

p-19-1 原文

Reading with a young child is important. But does it matter whether you read from an electronic book or traditional print? As any parent knows, small children are generally keen on screens. So the finding from a new study that very young children enjoy electronic books more than printed picture books may not come as a huge surprise - but the following additional findings might: both parents and children behaved differently when reading electronic versus printed picture books. And the children who read the electronic books learned more.

与年幼的孩子一起阅读很重要。但从电子书还是传统纸质书阅读，这一点是否有区别呢？正如任何家长都知道的那样，幼儿通常都很喜欢屏幕。因此，一项新研究发现，幼儿更喜欢电子书而不是纸质图画书，这或许并不令人十分意外--但接下来的附加发现可能会让人感到意外：家长和孩子在阅读电子图画书与纸质图画书时的行为有所不同。而且，阅读电子书的孩子学到了更多内容。

Previous studies of young children have suggested that electronic books, which incorporate extra features such as dictionaries and images that depict story events, may have advantages over print. In fact, multiple studies have found that electronic books support story comprehension and vocabulary gains beyond what is provided by printed books. But there's also work suggesting that children sometimes invest less mental effort in learning from electronic books, and that parents talk less about content when sharing such books.

此前针对幼儿的研究表明，电子书加入了词典、描绘故事情节的图片等额外功能，因此可能比纸质书更具优势。事实上，多项研究发现，电子书在促进故事理解和词汇增长方面，所起的作用超出了纸质书所能提供的效果。但也有研究表明，孩子有时在从电子书中学习时投入的脑力较少，而且家长与孩子共同阅读电子书时，对内容谈论得也比较少。

The study we're looking at today aims to give us a better understanding of how good electronic books are for young children. For this study, researchers videoed children aged 17 to 26 months reading with one of their parents. Each parent-child pair was randomly assigned to read either two educational electronic books or two printed books with the same content. While the parent read the words in the printed books aloud, the electronic books had audio of voice actors reading the text.

我们今天要了解的这项研究，旨在帮助我们更好地理解电子书对幼儿究竟有多大益处。在这项研究中，研究人员拍摄了17至26个月大的孩子与其中一位家长共同阅读的过程。每一对家长和孩子被随机分配阅读两本教育类电子书，或两本内容相同的纸质书。家长大声朗读纸质书中的文字，而电子书则配有配音演员朗读文本的音频。

The researchers found that parents who read the printed books pointed more frequently to pages than parents who read the electronic books. But the opposite was true for the children. Children who read the electronic books also commented more on the content and learned more new words than the children who read printed books.

研究人员发现，阅读纸质书的家长比阅读电子书的家长更频繁地指向书页。但孩子的情况正好相反。阅读电子书的孩子还会更多地评论书中内容，并且比阅读纸质书的孩子学会更多新词。

This greater learning is ascribed to greater engagement with the electronic books. It's important to note that the electronic books in the study were simple. While they included background music, animation and sound effects, there were no other extra features.

这种更好的学习效果被归因于孩子对电子书更高的参与度。需要注意的是，这项研究中的电子书很简单。虽然其中包含背景音乐、动画和音效，但没有其他额外功能。

It's also important to note that there's research on older children, finding that electronic books don't always bolster learning. Parents and educators need to beware. Extra features in electronic books may increase children's participation with them; however, if these features don't draw attention to the educational content, they may not serve as a supportive feature.

同样需要注意的是，针对年龄较大儿童的研究发现，电子书并不总能促进学习。家长和教育工作者需要对此保持警惕。电子书中的额外功能可能会提高孩子对电子书的参与度；然而，如果这些功能不能将孩子的注意力吸引到教育内容上，那么它们可能就无法起到支持作用。

Questions 22 to 25 are based on the recording you have just heard.

p-22-1 原文

Let me be honest with you. If you're living your life full of regrets, you're wasting your time. Why would you go through life regretting the very decisions that made you who you are today? There are plenty of unfavorable decisions we've made, but does that mean we should regret them? No!

让我坦诚地告诉你。如果你满怀悔恨地生活，就是在浪费时间。你为什么要在一生中不断后悔那些造就了今天的你的决定呢？我们做过许多不利的决定，但这是否意味着我们应该后悔？不！

I've had many moments where I sit and think about all the things I wish I could have done differently. However, just because things could be different, it doesn't necessarily mean they would be better. You don't have to continually be thinking of all your past decisions and whether or not you made the right one. You can't go back and change anything, so what's the point in worrying about it?

我曾有过许多时候，坐下来思考所有那些我希望自己能够做得不同的事情。然而，仅仅因为事情本可以有所不同，并不一定意味着结果会更好。你不必一直思考过去所做的每一个决定，以及自己是否做出了正确的选择。你无法回到过去改变任何事情，那么又何必为此担忧呢？

Every single decision you've ever made, positive or negative, has made you the person you are today. We want to go back and change parts of our past, but what would be the benefit of that? We would have lost the valuable knowledge from the lessons we learned.

你曾经做出的每一个决定，无论积极还是消极，都造就了今天的你。我们想回到过去，改变过去的一些部分，但那样做会有什么益处呢？我们会失去从所学教训中获得的宝贵知识。

There are reasons you make the choices you do, and that tells us about who you are. So when it comes to any decision in life, be unapologetically yourself. Because at the end of the day, it was you who made that decision.

你所做的每个选择都有其原因，而这些原因体现了你是怎样的人。因此，当你面对人生中的任何决定时，都要毫不 apologetically 地做自己。因为归根结底，是你做出了那个决定。

With less time spent focused on regrets, you'll finally have time to focus on the more essential things in life. In any situation, you grow more as a person with every decision you make. Life is full of lessons to learn, so we can't let regret stop us from moving forward.

少花些时间专注于悔恨，你终于会有时间去关注生活中更重要的事情。在任何情况下，你都会随着自己做出的每一个决定而不断成长。生活充满了值得学习的教训，所以我们不能让悔恨阻止我们继续前进。

We don't know if we've made the right or wrong choice until after it's already been made, so it can be easy to start regretting your decision. But if the decision has already been made, what's the purpose of dwelling on it? There isn't one. All you can do is move forward. You can't let yourself sit there and worry about every past choice. We aren't all perfect.

在一个选择已经做出之前，我们不知道它究竟是正确的还是错误的，所以很容易开始后悔自己的决定。但如果决定已经做出，反复纠结它又有什么意义呢？没有任何意义。你能做的只有继续向前。你不能让自己坐在那里，为过去做出的每一个选择忧虑不已。我们都不可能完美。

Whenever you make a decision, there will always be a possibility for regret later, but that's how life is supposed to be. You will make poor decisions in life - we all do - but it's what you do with the lessons learned that matters.
