# 2026-06 第1套（补充来源套号）

## Questions 1 to 4 are based on the conversation you have just heard.

p-1-1 原文

M: Welcome to "Business Matters". Today we have invited career development consultant Lucy Williams to talk about how to get ahead at work. Hi, Lucy. Many of us never seem to get promoted. Why is that? And what can we do about it?

M: 欢迎收听《商业纵横》。今天我们邀请了职业发展顾问露西·威廉姆斯，来谈谈如何在职场上取得成功。你好，露西。我们很多人似乎一直得不到晋升，这是为什么？我们又能做些什么呢？

查看该段公开来源

p-1-2 原文

W: One mistake people make is to limit communication only to their bosses. It's important to expand your network and include your co-workers.

W: 人们常犯的一个错误，是把沟通对象局限在自己的上司。拓展人际网络很重要，也要把同事纳入其中。

查看该段公开来源

p-1-3 原文

M: But some of our co-workers are less senior to us. Is it really necessary to connect with them?

M: 但我们有些同事的职位比我们低。真的有必要和他们建立联系吗？

查看该段公开来源

p-1-4 原文

W: It's important not to underestimate your colleagues. Sometimes a job title might not clearly demonstrate the influence they may have.

W: 重要的是不要低估你的同事。有时候，职位名称并不能清楚地体现他们可能拥有的影响力。

查看该段公开来源

p-1-5 原文

M: Now many of us think that working hard creates a good impression, but this isn't always true, is it?

M: 现在我们很多人都认为努力工作会给别人留下好印象，但事实并不总是如此，对吧？

查看该段公开来源

p-1-6 原文

W: That's right. We should avoid trying to take on too much work and constantly staying late, just to show that you are committed.

W: 没错。我们应该避免为了表现出自己的投入，就试图承担过多的工作，还总是加班到很晚。

查看该段公开来源

p-1-7 原文

M: I see. So setting expectations too high at the beginning can make us look bad if we don't maintain them.

M: 我明白了。所以，一开始就把别人对我们的期待设得太高，如果后来无法保持，就可能让我们看起来很糟糕。

查看该段公开来源

p-1-8 原文

W: Yeah, it's better to make sure you are putting in quality time instead of just a large quantity of time. And these efforts can easily be demonstrated by the results we achieve.

W: 是的，最好确保自己投入的是高质量的时间，而不只是大量的时间。而且，我们取得的成果很容易证明这些努力。

查看该段公开来源

p-1-9 原文

M: What about helping others at work? Should you try and go beyond your normal responsibilities and offer to help people with their projects?

M: 那么，在工作中帮助别人呢？你是否应该尽力超越自己的日常职责，主动提出帮助别人完成项目？

查看该段公开来源

p-1-10 原文

W: Extend your assistance to those who need it, but only as long as your own work will not go unattended. If someone can benefit from your assistance or advice, help them out to gain their respect and trust.

W: 向那些需要帮助的人提供援助，但前提是不能让自己的工作无人处理。如果有人能从你的帮助或建议中获益，就帮他们一把，以赢得他们的尊重和信任。

查看该段公开来源

p-1-11 原文

M: But it goes without saying that you shouldn't act like a know-it-all, otherwise you'll appear arrogant.

M: 不过，显而易见，你不应该表现得像个无所不知的人，否则会显得傲慢。

查看该段公开来源

p-1-12 原文

W: Absolutely. Be humble, and you'll get a lot of time later on to show your genius.

W: 当然。保持谦逊，之后你会有很多时间展现自己的才华。

查看该段公开来源

## Questions 5 to 8 are based on the conversation you have just heard.

p-5-1 原文

W: I think we first need to decide how to divide up the presentation responsibilities. From what I recall, the presentation consists of five parts, not including the introduction and conclusion. That would mean altogether, we need to allocate seven parts between the two of us.

W: 我觉得我们首先需要决定如何分配演示的任务。据我所记得，这次演示由五个部分组成，不包括开头和结尾。也就是说，我们总共需要在我们两个人之间分配七个部分。

查看该段公开来源

p-5-2 原文

M: So, we have the abstract, background research, the project design, the results and the discussion portions. As the abstract section only applies to the article, we needn't include it in the presentation. How would you suggest we dole out the rest?

M: 所以，我们有摘要、背景研究、项目设计、结果和讨论这几个部分。由于摘要部分只适用于文章，我们不必把它包括在演示中。你建议我们如何分配剩下的部分？

查看该段公开来源

p-5-3 原文

W: How do you feel about handling the background bit? In this way, we can both discuss the part of the project that we devoted most of our time to.

W: 你觉得由你来负责背景研究部分怎么样？这样一来，我们就都可以讲述自己投入最多时间的项目部分了。

查看该段公开来源

p-5-4 原文

M: Hold on a minute. You want me, the one who did the bulk of the task, to also do the majority of the presentation? The background research which was so meticulous took more than a month.

M: 等一下。你是想让我这个承担了大部分任务的人，再负责演示的大部分内容？那份一丝不苟的背景研究花了一个多月的时间。

查看该段公开来源

p-5-5 原文

W: OK. OK. I get it. Quit your moaning. I appreciate the rigorous work ethic you applied to the research, but not the sarcasm that comes up every time I mention it. What do you think would be a fair arrangement?

W: 好了，好了。我明白了。别再抱怨了。我认可你在研究中所表现出的严谨工作态度，但不欣赏每次我提到这件事时你表现出的讽刺。你觉得怎样分配才公平？

查看该段公开来源

p-5-6 原文

M: I think the best arrangement would be to split the research into two parts: before-1980 and afterward. I would take the before-portion and you would be assigned the after-1980, leaving the project and results. I

volunteer to describe the project. But as I struggled a bit with thestatistics in the results section, how about you handling that?

M: 我觉得最好的安排是把研究分成两部分：1980年以前和之后。我负责1980年以前的部分，你负责1980年以后的部分，项目设计和结果部分则另行分配。我自愿介绍项目设计。不过，我在结果部分的统计数据方面有些吃力，你来负责那一部分怎么样？

查看该段公开来源

p-5-7 原文

W: That's agreeable to me. I propose we both handle the discussion section in parts along with the question and answer afterward, leaving only the introduction and conclusion.

W: 我觉得这样可以。我提议我们分段负责讨论部分，之后的问答环节也由我们共同完成，这样就只剩下开头和结尾了。

查看该段公开来源

p-5-8 原文

M: I will take responsibility for the conclusion and put you in charge of the introduction. This will make it so that we alternate presenting, so as to avoid sounding monotonous to the audience.

M: 我来负责结尾，你来负责开头。这样我们就可以交替进行演示，避免让听众觉得单调。

查看该段公开来源

## Questions 9 to 11 are based on the passage you have just heard.

p-9-1 原文

Makeup can do more than just change your appearance-it can also alter others' perceptions of you, for better or for worse. According to new research from the University of Stirling in Scotland, although both men and women perceive women who wear makeup as being of a higher status, men associate makeup with prestigious, positive qualities, while women view other women wearing makeup as being dominant and a potential threat.

化妆不仅能改变你的外表，还能改变他人对你的看法，结果可能更好，也可能更糟。根据苏格兰斯特灵大学的一项新研究，虽然男性和女性都认为化妆的女性地位更高，但男性会将化妆与有声望、积极的品质联系起来，而女性则认为化妆的其他女性更具支配性

，并可能构成威胁。

查看该段公开来源

p-9-2 原文

The research showed that men and women both rated the faces with cosmetics as being more attractive, but only women rated made-up faces as being more dominant, while only men rated made-up faces as being higher in prestige.

研究表明，男性和女性都认为化妆后的面孔更具吸引力，但只有女性认为化妆后的面孔更具支配性，只有男性认为化妆后的面孔具有更高的声望。

查看该段公开来源

p-9-3 原文

A follow-up study investigated the root cause behind these differences in perception, and found that female-on-female jealousy seemed to be the main cause of the differences in perception. Women rating women with makeup said they would be more jealous of them and thought they would be more attractive to men than their non-makeup wearing counterparts.

一项后续研究探究了这些认知差异背后的根本原因，发现女性之间的嫉妒似乎是造成这种认知差异的主要原因。对化妆女性进行评价的女性表示，她们会更嫉妒这些女性，并认为相比不化妆的女性，她们对男性更具吸引力。

查看该段公开来源

p-9-4 原文

Cosmetic products are good for more than just giving you a pretty face. It can be particularly useful for women to understand how wearing makeup alters others' perceptions of them in situations where they are trying to gain others' trust and admiration. At a job interview, knowing whether the hiring committee will consist of men or women might influence a female candidate's decision about wearing makeup. Whether the interviewers will view her as attractive, dominant and prestigious can affect the interviewers' actions and perhaps the outcome of the interview itself.

化妆品的作用不只是让你拥有一张漂亮的脸。对于女性而言，了解化妆如何改变他人对自己的看法，尤其是在试图赢得他人的信任和钦佩时，可能非常有用。在求职面试中，了解招聘委员会由男性还是女性组成，可能会影响女性求职者是否化妆的决定。面试官是否会认为她具有吸引力、支配性和声望，可能会影响面试官的行为，甚至可能影响面

试本身的结果。

## Questions 12 to 15 are based on the passage you have just heard.

p-12-1 原文

You may have seen advertisements trumpeting methods of changing a habit that require absolutely no willpower whatsoever. But can you really change a bad habit or create a good one without willpower? To answer this question, we first have to ask: "What is willpower?" Most people, sadly, think of it only as the ability to clench their teeth and resist attractive temptations. In this view, willpower means self-denial and no fun. No wonder people hope to make changes without it.

你可能见过一些广告大肆宣扬无需任何意志力就能改变习惯的方法。但你真的能够在没有意志力的情况下改掉坏习惯或养成好习惯吗？要回答这个问题，我们首先必须问：“什么是意志力？”遗憾的是，大多数人只把它看作咬紧牙关、抵制诱人诱惑的能力。在这种看法中，意志力意味着自我克制和毫无乐趣。难怪人们希望不借助意志力就能做出改变。

查看该段公开来源

p-12-2 原文

I define willpower as "using only the thought of your motivators to control your actions." Let's say your motivators are "prevent diabetes" and "reach a healthy weight". So if you are at the all-you-can-eat buffet, you think about your motivator-avoid diabetes through weight loss-and you take small portions and avoid the dessert table.

我把意志力定义为“仅凭想到自己的动机来控制行为”。假设你的动机是“预防糖尿病”和“达到健康体重”。那么，当你在自助餐厅面对不限量供应的食物时，你会想到自己的动机--通过减重来避免糖尿病--于是少量取食，并避开甜点区。

查看该段公开来源

p-12-3 原文

So, amazingly enough, willpower begins with a thought-a bright idea-some way to improve your life or contribute to others. This bright idea is your motivator.

所以，令人惊讶的是，意志力始于一个想法--一个改善生活或为他人做出贡献的好主意。这个好主意就是你的动机。

查看该段公开来源

p-12-4 原文

Doctor Walter Mischel, an expert on willpower skills, uses the expressive term "a burning goal". Whether you call it a motivator, a burning goal, or a bright idea, this idea is the force behind your willpower.

意志力技能专家沃尔特·米歇尔博士使用了“一个燃烧的目标”这一生动的说法。无论你把它称为动机、燃烧的目标，还是好主意，这个想法都是意志力背后的力量。

查看该段公开来源

p-12-5 原文

What sort of bright ideas-motivators-make for effective willpower? In fact, any goal that you value strongly counts. The list may include good health, self-respect, a better future for your family, a personal mission and being a role model for your child. All these can certainly drive a positive change.

什么样的好主意--也就是动机--能够产生有效的意志力？事实上，任何一个你高度重视的目标都算在内。这个清单可能包括良好的健康状况、自尊、为家人创造更美好的未来、个人使命，以及成为孩子的榜样。所有这些都确实能够推动积极的改变。

## Questions 16 to 18 are based on the recording you have just heard.

p-16-1 原文

For many pregnant women, understanding what seafood is safe and healthy and what should be avoided because of mercury concerns comes with a lot of worrying. In part, that's because the federal government's advice on the matter, first issued in 2004, has long been criticized as vague. That guidance has included advice on how much seafood to eat, and which species pregnant and breastfeeding women should avoid over concerns about mercury contamination. But critics say the government advisory has done more harm than good, scaring many pregnant and breastfeeding women away from eating seafood altogether.

对许多孕妇来说，了解哪些海产品安全且有益健康，以及哪些海产品因担心汞而应当避免，会带来许多忧虑。部分原因在于，联邦政府首次于2004年发布的相关建议长期以来一直被批评含糊不清。该指导意见包括关于应食用多少海产品，以及孕妇和哺乳期女性因担心汞污染而应避免哪些种类的建议。但批评者表示，政府的这份指导意见弊大于利，使许多孕妇和哺乳期女性彻底不敢食用海产品。

查看该段公开来源

p-16-2 原文

The problem is real. According to a spokesman for the Food and Drug Administration, or FDA for short, the agency analyzed fish consumption data from more than 1,000 pregnant women in the US and found that 21 per cent of them ate no fish whatsoever in the previous month. And those who did eat fish consumed far less than recommended by the dietary guidelines. Some 50 per cent ate less than two ounces a week and 75 per cent ate less than four ounces.

这个问题确实存在。据美国食品药品监督管理局（简称FDA）一位发言人介绍，该机构分析了美国一千多名孕妇的鱼类食用数据，发现其中21%在前一个月完全没有吃鱼。而那些吃鱼的人，摄入量也远低于膳食指南的建议。约50%的人每周摄入量少于两盎司，75%的人少于四盎司。

查看该段公开来源

p-16-3 原文

This week the FDA issued an update to the advice, listing more than sixty species in a chart that ranks fish as A Best Choice, Good Choice and Choices to Avoid. The goal is to make it easier for mothers-to-be to feel confident about the type of seafood they include in their diets. The new advice recommends consumers choose a variety of fish to eat, and it comes with an easy-to-understand illustration of what an appropriate portion size should be-four ounces for an adult and two ounces for children aged four to seven.

本周，FDA更新了相关建议，在一张图表中列出六十多种鱼类，并将其分为“最佳选择”“不错的选择”和“应避免的选择”。此举旨在让准妈妈更容易对自己饮食中所摄入的海产品种类感到放心。新建议推荐消费者食用多种鱼类，并配有一幅易于理解的图示，说明适当的食用分量应为多少：成年人四盎司，四至七岁的儿童两盎司。

查看该段公开来源

p-16-4 原文

And while expectant mothers have long been warned to stay away from shark and four other particular types of fish from the Gulf of Mexico, now there are three new species on the list of what to avoid. But not everyone is thrilled with the new advice. Critics say the new advice doesn't always agree with the agency's own scientific findings. While mercury is of great concern when people are talking about pregnant women and seafood, it's not the only factor contributing to anxiety.

长期以来，准妈妈一直被告诫要避开鲨鱼以及另外四种来自墨西哥湾的特定鱼类，而现在，又有三种鱼类被列入应避免食用的名单。但并非所有人都对这份新建议感到满意。批评者表示，新建议并不总是与该机构自己的科学研究结果一致。人们谈论孕妇和海产品时，汞确实是非常令人担忧的因素，但它并不是导致焦虑的唯一因素。

查看该段公开来源

p-16-5 原文

The FDA maintains that its final consumption recommendations were based on thorough scientific analysis. Agency spokesman Cassell says the FDA believes their recommendations will increase confidence, not uncertainty. But critics disagree. They think the FDA's advice is not based on the evidence in its own detailed report, and so it confuses everyone.

FDA坚持认为，其最终的食用建议是基于全面的科学分析制定的。该机构发言人Cassell表示，FDA相信这些建议将增强信心，而不是增加不确定性。但批评者对此并不认同。他们认为，FDA的建议并没有以其自身那份详细报告中的证据为依据，因此让所有人都感到困惑。

查看该段公开来源

## Questions 19 to 21 are based on the recording you have just heard.

p-19-1 原文

I know you're busy with work, but you also need to take some time off to recharge those batteries. So, should you plan one big vacation for the year, or should you take multiple short vacations throughout? Quantity can sometimes beat quality. First and foremost, regardless of how you use your vacation days, you need to be using them, and soon. The longer you put off your time off, the worse you're making things for yourself.

我知道你忙于工作，但你也需要抽出一些时间休息，让自己的精力得到恢复。那么，你应该为这一年安排一次长假，还是应该在全年安排多次短假？数量有时胜过质量。首先，无论你如何使用假期，都需要真正使用它们，而且要尽快使用。你越是推迟休假，就越是在让自己的处境变得糟糕。

查看该段公开来源

p-19-2 原文

One 9-year-long study published in Psychosomatic Medicine suggests not taking at least one vacation a year may increase your risk of mortality due to heart disease. So, not only are you killing your joy, you're possibly killing yourself. Give yourself a break, folks.

《心身医学》发表的一项为期9年的研究表明，每年至少不休一次假，可能会增加因心脏病死亡的风险。所以，你不仅是在扼杀自己的快乐，也可能是在置自己于死地。各位，给自己放个假吧。

查看该段公开来源

p-19-3 原文

When you should take those breaks, however, depends on a few factors: how many days you have available to use, what activities bring you joy, whether you have a family or not, and other variables come into play. Because of that, there's no perfect formula that works for everyone, but there are still a few things everyone can try to shoot for. We know that in terms of maximizing relaxation, you should aim for vacations that range somewhere between 7 and 11 days long. That gives you enough time to let go of your stress at work, completely loosen up, and achieve full-on calm.

不过，你应该在什么时候休假，取决于几个因素：你有多少天可用假期、哪些活动能给你带来快乐、你是否有家庭，以及其他会产生影响的变量。正因为如此，并不存在适用于所有人的完美公式，但还是有几件事是每个人都可以努力做到的。我们知道，就最大限度地放松而言，你应该争取安排7到11天的假期。这样你就有足够的时间摆脱工作压力，彻底放松下来，达到完全平静的状态。

查看该段公开来源

p-19-4 原文

That above-mentioned study also recommends you space out your vacations evenly instead of using up all of your days at once. Eight days might sound

like a lot for someone who only gets 10 days of vacation a year. But if youframe them with weekends, you can manage two evenly spaced 8-day vacationsa year. If you have 14 days of paid leave, that's almost three separate8-day vacations you can use to split your year into thirds.

上述研究还建议你把假期均匀地分散开来，而不是一次性用完所有假期。对于一年只有10天假期的人来说，8天听起来可能很多。但如果把周末安排在假期前后，你一年就可以安排两次间隔均匀的8天假期。如果你有14天带薪休假，那几乎可以安排三次分别为8天的假期，用来把一年分成三个阶段。

查看该段公开来源

p-19-5 原文

As tempting as it might be to use all your days to take one long summer break, your overall goal should be to achieve the perfect balance between length plus joy and frequency. Vacation frequency is important because planning multiple breaks throughout the year means you always have something to look forward to. Planning things and the anticipation that comes with it tend to make us happier. If you only take one long vacation every year, the excitement builds much more slowly and seems so far off that it can actually lead to feelings of despair.

尽管把所有假期都用来享受一次漫长的暑假可能很有吸引力，但你的总体目标应该是在假期长度、愉悦感和休假频率之间取得完美平衡。休假频率很重要，因为在全年安排多次休息意味着你总有值得期待的事情。筹划事情以及随之而来的期待往往会让我们更加快乐。如果你每年只休一次长假，兴奋感会积累得慢得多，而且由于假期看起来遥不可及，实际上可能会让人产生绝望感。

查看该段公开来源

## Questions 22 to 25 are based on the recording you have just heard.

p-22-1 原文

Autonomous cars that can take over from drivers if they are tired or caught in the heat of an argument are being developed in Sweden. Researchers working as part of the European Union's €77 billion research program are developing sensor-based systems that monitor whether a driver is distracted, anxious or tired. If a driver is not in a fit state to be on the road, the car automatically takes control of the wheel to prevent

accidents. Doctor Anna Anund from the Swedish National Road and TransportResearch Institute, who is leading the project, said a driver's state canbe measured using a number of sensors, including heart rate monitors andeye sensors, which track where a driver's gaze is. She said the aim was toreally make sure that the transition from the driver to the vehicle is donein a safe way, so we can take into consideration the driver's state, and sowe do not give control to a driver who is under pressure of fatigue,stress, anxiety, and so on.

在瑞典，人们正在研发能够在驾驶员疲劳或陷入激烈争论时接替其驾驶的自动驾驶汽车。作为欧盟770亿欧元研究计划一部分开展工作的研究人员，正在开发基于传感器的系统，用于监测驾驶员是否分心、焦虑或疲劳。如果驾驶员的状态不适合上路，汽车会自动接管方向盘，以防止发生事故。负责该项目的瑞典国家道路与运输研究所安娜·阿农博士表示，可以利用多种传感器测量驾驶员的状态，包括心率监测器和眼部传感器，后者可以追踪驾驶员的视线方向。她说，目标是真正确保从驾驶员到车辆的控制权转换以安全的方式完成，这样我们就能考虑到驾驶员的状态，也不会把控制权交给正承受疲劳、压力、焦虑等影响的驾驶员。

查看该段公开来源

p-22-2 原文

According to data from the European Commission, Sweden has the safest roads in the EU, with the UK a close second. However, the number of road accidents in both has largely levelled out since 2010. Driver fatigue is thought to be responsible for as many as a fifth of road crashes across the EU, although there are certain times of the day when more accidents happen. At 6:00 a.m., for example, drivers are said to be 20 times more likely to have an accident than at 10:00 a.m. While most experts agree driverless technology should help bring down accident numbers in the long term, some have questioned whether it is safe.

根据欧盟委员会的数据，瑞典拥有欧盟最安全的道路，英国紧随其后。不过，自2010年以来，两国的道路事故数量基本趋于平稳。据认为，驾驶员疲劳要对欧盟范围内多达五分之一的道路事故负责，尽管一天中某些时段发生的事故更多。例如，据称驾驶员在早上6点发生事故的可能性是在上午10点时的20倍。尽管大多数专家都认为，从长远来看，无人驾驶技术应有助于降低事故数量，但一些人质疑其是否安全。

查看该段公开来源

p-22-3 原文

The researchers have said the technology they are developing is seeking to bridge the gap between Level 3 on the autonomy scale, in which drivers have to be ready to take control of the car at any point, and Level 4, in which driving is automated.

研究人员表示，他们正在开发的技术旨在弥合自动驾驶等级体系中第3级与第4级之间的差距：在第3级，驾驶员必须随时准备接管汽车；而在第4级，驾驶过程实现自动化。

查看该段公开来源

p-22-4 原文

Daniel Ruiz, the chief executive of the UK's connected and autonomous vehicle programme Meridian, said: "there is a strong debate going on about how it is possible to make a Level 3 car completely safe." Despite advances in technology, we still have some way to go in shifting public sentiment. With an increase in attention-grabbing accidents recently, drivers now view self-driving cars as less safe than they used to.

英国互联与自动驾驶汽车项目Meridian的首席执行官丹尼尔·鲁伊斯说："关于如何让第3级汽车完全安全，目前正在展开激烈的讨论。"尽管技术取得了进步，但要改变公众的看法，我们仍有一段路要走。随着近期引人关注的事故增多，如今驾驶员认为自动驾驶汽车不如过去安全。

## 2026-06 第2套（补充来源套号）

### Questions 1 to 4 are based on the conversation you have just heard.

p-1-1 原文

W: Hi, Frank, are you working through your lunch hour again?

W: 嗨，弗兰克，你又在午餐时间工作吗？

查看该段公开来源

p-1-2 原文

M: No, not at all. It's my 10th wedding anniversary next week, and I promised Jane that I would book a city break for us, as I have annual leave to take, and it would be nice to celebrate somewhere warm. So, I'm trying

to book something in Barcelona.

M: 不，完全不是。我和简下周要过结婚十周年纪念日了，我答应过她要为我们预订一次城市短途旅行，因为我还有年假要休，而且能找个温暖的地方庆祝一下也不错。所以，我正在设法预订去巴塞罗那的行程。

查看该段公开来源

p-1-3 原文

W: That sounds so romantic. I adore Barcelona. It's such a fabulous cosmopolitan city. There's so much to do there, excellent food, and that cathedral that they are still building after about 150 years. Very cool.

W: 听起来真浪漫。我非常喜欢巴塞罗那。那是一座非常棒的国际化城市。那里有很多事情可做，美食也很棒，还有那座已经修建了大约150年、至今仍在建造的教堂。太酷了。

查看该段公开来源

p-1-4 原文

M: I know. But the anniversary is looming, and I'm still scrambling to find accommodation. Everything is either wildly expensive or already fully booked. I'm starting to feel a bit frantic.

M: 我知道。但纪念日就要到了，我还在手忙脚乱地找住宿。要么贵得离谱，要么已经全部订满。我开始有点慌了。

查看该段公开来源

p-1-5 原文

W: Well, if you are going for a whole week, why don't you do a couple of nights in somewhere really glamorous, and then do the rest of the week a bit further up the coast, where the accommodation is cheaper, and that will offset the cost of the expensive place?

W: 这样吧，如果你们要去整整一周，为什么不先在一个非常豪华的地方住几个晚上，然后把剩下的时间安排在海岸线再往北一点的地方，那里住宿更便宜，这样就能抵消住昂贵地方的费用了？

查看该段公开来源

p-1-6 原文

M: That might be a good plan. It's not too expensive to rent a car, so we could still drive into the city. Yes, there are lots of places outside the city that have pools and are all inclusive, so we wouldn't even need to pay for food or drinks. I'll send a query now about the dates we're interested in.

M: 这或许是个不错的计划。租车也不算太贵，所以我们还是可以开车进城。对了，城外有很多地方带游泳池，而且提供全包服务，这样我们连吃饭和饮料的钱都不用另外付了。我现在就发个咨询，问问我们感兴趣的日期是否有空。

查看该段公开来源

p-1-7 原文

W: That sounds perfect. I'm sure that Jane will be absolutely thrilled to bits. I really do recommend visiting that cathedral. You can go all the way up to the top of it, but you need to go up a really steep spiral staircase to get there.

W: 听起来太完美了。我相信简一定会高兴坏的。我真的很推荐去参观那座教堂。你们可以一直登到顶部，但要到那里必须爬一段非常陡的螺旋楼梯。

查看该段公开来源

p-1-8 原文

M: Considering Jane is terrified of heights, I think if I tried to make her do that, I would come back divorced. Thanks for the help though; it was turning into a logistical nightmare.

M: 考虑到简恐高，我要是想让她去爬那个，我回来时可能就已经离婚了。不过还是谢谢你的帮助；这件事本来都快变成一场后勤噩梦了。

## Questions 9 to 11 are based on the passage you have just heard.

p-9-1 原文

In America, at least, passion is a word that often comes up on job descriptions and in interviews. On the whole, passionate people are thought of in a positive light and considered likely to achieve their goals. But when it comes to predicting achievement, has the importance of passion been overstated?

至少在美国，求职描述和面试中经常会提到“热情”一词。总的来说，人们对有热情的人持正面看法，认为他们很可能实现自己的目标。但说到预测成就时，热情的重要性是否被夸大了？

查看该段公开来源

p-9-2 原文

According to a new study from Stanford University, passion may be less important in certain cultures, and the fact that passion is often seen as a key to achievement may reflect a distinctly Western model of motivation. The chief factor explored in the study was how individualistic a society was. In individualistic cultures, the researchers assert, people are more motivated by pursuing paths related to their passions, but those in collectivistic cultures are more likely to see themselves as part of a network. They often place fulfilling obligations to others above focusing on their own interests.

根据斯坦福大学的一项新研究，热情在某些文化中的重要性可能较低，而热情常被视为成就关键这一事实，或许反映了一种明显具有西方特色的动机模式。研究考察的主要因素是一个社会的个人主义程度。研究人员断言，在个人主义文化中，人们更容易受到追求与自身热情相关道路的激励；而集体主义文化中的人则更可能将自己视为某个社会网络的一部分。他们往往更重视履行对他人的义务，而不是专注于自身的兴趣。

查看该段公开来源

p-9-3 原文

The researchers looked at data from nearly 60 countries. They found that in science subjects, passion was positively correlated with academic achievements. Higher levels of enjoyment and interest also bolstered test scores.

研究人员考察了来自近60个国家的数据。他们发现，在科学类学科中，热情与学业成就呈正相关。更高程度的愉悦感和兴趣也会提高测试成绩。

查看该段公开来源

p-9-4 原文

But the strength of this correlation wasn't the same across cultures. Those in individualistic societies such as the U.S., Australia, and the UK showed a stronger link between passion and achievement. The effect of passion on performance was more subtle for those in more collectivistic societies such as Colombia or Thailand.

但这种相关性的强度在不同文化之间并不相同。在美国、澳大利亚和英国等个人主义社会中，热情与成就之间的联系更为紧密。而对于哥伦比亚或泰国等更加集体主义的社会而言，热情对表现的影响则更为微妙。

查看该段公开来源

p-9-5 原文

These findings were mirrored in achievement in both mathematics and reading. It's clear from the findings that passion isn't the only thing that motivates people to achieve their goals.

数学和阅读方面的成就也呈现出同样的情况。从这些研究结果可以清楚看出，热情并不是激励人们实现目标的唯一因素。

## Questions 12 to 15 are based on the passage you have just heard.

p-12-1 原文

Why does nature create patterns? The reason patterns often appear in nature is simple: the same basic physical or chemical processes occur in many pattern substances and organisms as they form. Whether in plants and animals or rocks, foams and ice crystals, the intricate patterns that happen in nature come down to what's happening at the level of atoms and molecules.

为什么自然界会形成各种图案？图案之所以经常出现在自然界中，原因很简单：在许多形成图案的物质和生物中，相同的基本物理或化学过程会反复发生。无论是在植物和动物中，还是在岩石、泡沫和冰晶中，自然界中出现的复杂图案，归根结底都与原子和分子层面发生的事情有关。

查看该段公开来源

p-12-2 原文

A pattern in nature is any regularly repeated arrangement of shapes or colors. Some of the most striking examples include the six-sided arrays of rocks at Giant's Causeway in the United Kingdom, and the colorful stripes and spots on tropical fish. Patterns like these begin to form at a small scale when materials undergo processes like drying, freezing, wrinkling, diffusing and reacting. Those changes then give rise to complex patterns at a larger scale that people can see.

自然界中的图案，是指形状或颜色有规律地重复排列的任何形式。其中一些最引人注目的例子包括英国巨人之路上六边形的岩石阵列，以及热带鱼身上色彩斑斓的条纹和斑点。这类图案在材料经历干燥、冻结、起皱、扩散和反应等过程时，会先在微小尺度上开始形成。随后，这些变化会在更大尺度上产生人们能够看见的复杂图案。

查看该段公开来源

p-12-3 原文

Imagine delicate frozen crystals on a window during winter. What creates that pattern? When water freezes, its molecules begin clustering together. Water molecules have a particular bent shape that causes them to stack into clusters as they freeze. As the cluster grows, many outside factors, including humidity and temperature, begin to affect its overall shape. If the water is freezing on a window, for example, random imperfections on the glass surface affect the stacking and create the larger pattern.

想象一下冬天窗户上精致的冰晶。是什么形成了这种图案？水结冰时，其中的分子开始聚集在一起。水分子具有特殊的弯曲形状，这使它们在冻结时会堆叠成团。随着团簇不断增大，包括湿度和温度在内的许多外部因素开始影响它的整体形状。例如，如果水是在窗户上结冰，玻璃表面的随机瑕疵就会影响分子的堆叠，并形成更大的图案。

查看该段公开来源

p-12-4 原文

But scientists do not always know the purpose of a pattern, or even if there is one. The molecular processes involved are simple enough that they might generate a pattern by coincidence.

但科学家并不总是知道某种图案的作用，甚至不知道它是否具有作用。相关的分子过程足够简单，因此它们可能只是偶然形成了某种图案。

## Questions 16 to 18 are based on the recording you have just heard.

p-16-1 原文

Many people, myself included, have multiple areas of life they would like to improve. For example, I would like to reach more people with my writing, to lift heavier weights at the gym, and to start practising mindfulness more consistently. Those are just a few of the goals I find desirable, and you probably have a long list yourself. The problem is, even if we are committed to working hard on our goals, our natural tendency is to return to our old habits at some point. Making a permanent lifestyle change is really difficult.

包括我在内，许多人都希望改善生活中的多个方面。例如，我希望通过写作让更多人读到我的作品，希望在健身房举起更重的重量，也希望开始更加持续地练习正念。这些只是我认为值得追求的几个目标，而你自己可能也列有一长串目标。问题在于，即使我们决心为目标努力奋斗，我们的自然倾向仍然是在某个时候回到旧有习惯。要永久改变生活方式确实非常困难。

查看该段公开来源

p-16-2 原文

Recently I've come across a few studies that will make these difficult lifestyle changes a bit easier. As you'll see, however, the approach to mastering many areas of life is somewhat counterintuitive. Research has shown that you are two to three times more likely to stick with your habits if you make a specific plan for when, where, and how you will perform the behavior. For example, in one study, scientists asked people to fill out a sentence to specify during the next week they would do at least 20 minutes of vigorous exercise on which day, at what time of day, and at or in what place. Researchers found that people who filled out this sentence were two to three times more likely to actually exercise compared to a control group who did not make plans for their future behavior. Psychologists call these specific plans implementation intentions because they state when, where, and how you intend to implement a particular behavior.

最近，我接触到了一些研究，这些研究将使这些艰难的生活方式改变变得稍微容易一些。不过，正如你将看到的，掌握生活中许多方面的方法有些违背直觉。研究表明，如果你针对自己将在何时、何地以及如何实施某种行为制订具体计划，那么坚持这些习惯的可能性会提高到原来的两到三倍。例如，在一项研究中，科学家要求人们填写一个句子，

具体说明自己将在下一周的哪一天、一天中的什么时间，以及在什么地点进行至少20分钟的剧烈运动。研究人员发现，与没有为未来行为制订计划的对照组相比，填写了这个句子的人实际进行锻炼的可能性高出两到三倍。心理学家将这些具体计划称为“执行意图”，因为它们说明了你打算在何时、何地以及如何实施某种特定行为。

查看该段公开来源

p-16-3 原文

However, follow-up research has discovered implementation intentions only work when you focus on one thing at a time. In fact, researchers found that people who tried to accomplish multiple goals were less committed and less likely to succeed than those who focused on a single goal.

然而，后续研究发现，执行意图只有在你一次专注于一件事时才会奏效。事实上，研究人员发现，试图实现多个目标的人，比专注于单一目标的人投入程度更低，成功的可能性也更小。

查看该段公开来源

p-16-4 原文

Another science-based reason to focus on one thing at a time is that when you begin practising a new habit, it requires a lot of conscious effort to remember to do it. After a while, however, the pattern of behavior becomes easier. Eventually, your new habit becomes a normal routine, and the process is more or less mindless and automatic. The most important thing to note is that there is some tipping point at which new habits become more or less automatic. The time it takes to build a habit depends on many factors, including how difficult the habit is, your genetics, and more.

一次专注于一件事还有一个基于科学的理由，那就是当你开始练习一种新习惯时，记得去做这件事需要付出大量有意识的努力。然而，过一段时间之后，这种行为模式会变得更加容易。最终，你的新习惯会成为一种日常惯例，而这一过程或多或少会变得无需意识参与，并且自动进行。需要注意的最重要一点是，存在这样一个临界点：在此之后，新习惯会或多或少地变得自动化。养成一个习惯所需的时间取决于许多因素，包括习惯的难度、你的遗传因素，以及其他因素。

## Questions 19 to 21 are based on the recording you have just heard.

p-19-1 原文

It was a lazy, hazy, crazy day on the dwarf planet Pluto when New Horizons, a spacecraft from Earth, flew by at a speed of 31,000 mph (miles per hour) two years ago. The spacecraft took a bunch of photos, made some quick measurements of Pluto's atmosphere, and sent them all back here, giving planetary scientists their first up-close look of the distant dwarf planet.

两年前，在新视野号这艘来自地球的航天器以每小时31,000英里（英里/小时）的速度飞掠而过时，矮行星冥王星度过了慵懒、朦胧而疯狂的一天。这艘航天器拍摄了大量照片，对冥王星的大气层进行了一些快速测量，并将这些数据全部传回地球，使行星科学家们首次近距离观察到这颗遥远的矮行星。

查看该段公开来源

p-19-2 原文

One of the more bizarre things they found was that the haze in Pluto's atmosphere was much thicker than previously thought. The planet also had an atmosphere much cooler than earlier estimates, topping out at -333.4° F.

他们发现的较为奇异的现象之一，是冥王星大气层中的霾比先前认为的厚得多。这颗行星的大气层也比早先估计的冷得多，最高温度仅为-333.4° F。

查看该段公开来源

p-19-3 原文

Now, a study published in Nature links those two atmospheric observations. A computer model developed by planetary scientist Xi Zhang and colleagues shows the haze of tiny droplets in the upper atmosphere is likely scattering light from the Sun, preventing heat from reaching the planet below. We see hazy skies on Earth too, from time to time, whenever solid particles get suspended in the air-from water-based fogs, to ash from fires, to the toxic droplets that make up a thick smog. But on Earth, the overall temperature of the planet is dominated by the distribution of gases in our atmosphere.

如今，《自然》杂志发表的一项研究将这两项大气观测结果联系了起来。行星科学家张希及其同事开发的一种计算机模型显示，高层大气中由微小液滴形成的霾很可能会散射来自太阳的光，阻止热量抵达下方的行星。地球上也会不时出现雾霾天气，每当固体颗粒悬浮在空气中时，就可能形成这种现象，从含水雾气到火灾产生的灰烬，再到构成浓重烟雾的有毒液滴，都是如此。但在地球上，行星的整体温度主要由大气层中气体的分布决定。

查看该段公开来源

p-19-4 原文

On Pluto, the authors suggest, haze might be more influential. Particles can reflect light from the Sun here on Earth: It happens after volcanoes erupt, emitting clouds of particles that reflect the Sun's rays into the atmosphere. Some people even propose imitating this phenomenon to alleviate the effects of climate change. But our planet isn't dominated by that process, or at least it hasn't been for a few billion years.

作者认为，在冥王星上，霾的影响可能更大。在地球上，颗粒物能够反射来自太阳的光：火山喷发后会释放出由颗粒物组成的云团，将太阳光线反射回大气层。有些人甚至提出模仿这一现象，以减轻气候变化的影响。但我们的行星并不是由这一过程主导的，至少在过去几十亿年里不是如此。

查看该段公开来源

p-19-5 原文

If Pluto's atmosphere is very different from ours and from that of other nearby planets, it could help scientists expand their understanding of planetary atmospheres. But right now, this is just a good guess based on data from New Horizons and a sophisticated computer model, not direct observations of the haze's composition.

如果冥王星的大气层与地球以及其他邻近行星的大气层截然不同，这将有助于科学家拓展对行星大气层的认识。但目前，这只是基于新视野号获得的数据和一个复杂计算机模型提出的合理推测，而不是对霾的成分进行直接观测所得出的结论。

查看该段公开来源

p-19-6 原文

There are other theories floating around to explain Pluto's cool temperatures, including blaming the cold air on gases in the atmosphere.

关于解释冥王星低温的理论还有其他一些，包括把寒冷的空气归因于大气层中的气体。

查看该段公开来源

p-19-7 原文

Luckily, the authors will get a chance to test their notions when the James Webb Space Telescope launches later. That observatory can detect different

spectrums of light, which the hazy Plutonian atmosphere would be positivelyglowing with as it scattered sunlight. The researchers just have to waitand see if the light from the telescope validates their bright idea.

幸运的是，詹姆斯·韦布空间望远镜稍后发射后，作者们将有机会检验他们的观点。这座天文台能够探测不同光谱的光，而冥王星朦胧的大气层在散射阳光时很可能会发出大量这样的光。研究人员只需等待并观察望远镜接收到的光是否会验证他们的这个妙想。

查看该段公开来源

## Questions 22 to 25 are based on the recording you have just heard.

p-22-1 原文

Parents have a small window where they can influence their 8- to 10-year-old children's music taste, researchers have concluded. The 24-month time frame comes at an age when youngsters are old enough to appreciate poetic lyrics and snappy tunes, but have not yet started to be embarrassed by their mother and father's preferences. Dr. Hauke Egermann, a lecturer in music at the University of York, carried out a literature review into more than a dozen studies looking at parental musical influence. "Children have an openness to new music, and this means parents have an important role to play in developing the musical preferences of their kids," he said.

研究人员得出结论，父母有一个短暂的窗口期，可以影响8至10岁孩子的音乐品味。这段24个月的时期处于这样一个年龄阶段：孩子已经足够大，能够欣赏富有诗意的歌词和朗朗上口的曲调，但还没有开始因父母的音乐偏好而感到尴尬。约克大学音乐讲师豪克·埃格尔曼博士对十多项有关父母音乐影响的研究进行了文献综述。他说：“孩子对新音乐持开放态度，这意味着父母在培养孩子的音乐偏好方面扮演着重要角色。”

查看该段公开来源

p-22-2 原文

However, time is of the essence as parental influence is most likely to be effective during the critical time period before age ten. During adolescence, children tend to gravitate away from their parents' choices and are more influenced by their peers. A separate survey of 2,000 British parents by music streaming service Deezer also found that nearly four-fifths of parents agreed that their children were far more receptive

to their musical suggestions before the age of ten. In contrast, just 10percent of parents reported positive reactions from their teenage childrenwhen they shared their favorite music. Some 79 percent of fathers said theyhad tried to influence their children's music, but just 69 percent ofmothers. However, mothers were more effective, with 38 percent reportingthat their kids loved the tunes they shared, compared to 30 percent of dadswho, in some cases, said their children cried or even fell asleep.

然而，时间至关重要，因为父母的影响最有可能在十岁以前这一关键时期发挥作用。进入青春期后，孩子往往会逐渐远离父母的选择，并更多地受到同龄人的影响。音乐流媒体服务Deezer对2000名英国父母进行的另一项调查也发现，近五分之四的父母认为，孩子在十岁以前更容易接受他们的音乐建议。相比之下，只有10%的父母表示，孩子进入青少年时期后，在他们分享自己喜爱的音乐时会作出积极反应。约79%的父亲表示曾试图影响孩子的音乐选择，而母亲的这一比例仅为69%。不过，母亲的影响更有效：38%的母亲表示孩子喜欢她们分享的曲调，而父亲中只有30%的人得到这样的反馈；有些父亲甚至表示，孩子听着听着哭了起来，或者睡着了。

查看该段公开来源

p-22-3 原文

Dr. Egermann claims introducing children to a variety of musical styles is the key to fostering good taste in later life. "By playing children a variety of genres before this critical period, research on familiarization suggests they will enjoy lots of different types of music as adults," he added. The benefits of having a wider taste in music include the ability to manage their emotions more effectively, socialize and bond with others more easily, and to have a better understanding of other cultures as well.

埃格尔曼博士认为，让孩子接触各种各样的音乐风格，是培养他们日后良好音乐品味的关键。他补充说："有关熟悉化的研究表明，在这一关键时期之前让孩子聆听多种音乐类型，他们成年后将会喜欢许多不同种类的音乐。"拥有更广泛的音乐品味所带来的益处包括更有效地管理情绪、更容易与他人交往并建立联系，以及更好地理解其他文化。

查看该段公开来源

p-22-4 原文

Dr. Egermann advises parents not to push their favorite music too hard on their children, but instead play it as background music while a child is

playing. They can also help create positive memories about artists andbands by going to concerts and live music events together.

埃格尔曼博士建议，父母不要过分强迫孩子接受自己喜爱的音乐，而应在孩子玩耍时将其作为背景音乐播放。他们还可以通过一起参加音乐会和现场音乐活动，帮助孩子对音乐家和乐队形成积极的记忆。
